Clean Storm 20261113 Rotary Pro 15" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor

Model Number: 20261113

Clean Storm 20261113 Rotary Pro 15" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor

Manufacturer: Clean Storm

Clean Storm 20261113 Rotary Pro 15" Telescopic Power Carpet Cleaning Wand Professional 10-Speed Rotary Carpet Extraction Cleaning Tool (ships after 01/23/2027)

The Clean Storm Rotary Pro 15" is a professional rotary carpet cleaning wand designed to combine mechanical carpet agitation, solution injection, and vacuum extraction into one powerful cleaning tool.
Unlike conventional carpet cleaning wands that rely primarily on the operator moving the wand back and forth, the Rotary Pro uses a motor-driven rotary cleaning head to provide continuous mechanical agitation during the extraction process.
The 15-inch cleaning head, telescoping handle, and adjustable 10-speed rotary control make this machine an excellent choice for professional carpet cleaners looking to increase productivity, improve soil removal, and reduce repetitive manual scrubbing.
Features and Benefits

- 15-Inch Wide Cleaning Head: Provides a generous cleaning path for residential and commercial carpet cleaning applications.
- 10-Speed Adjustable Rotary Agitation: Allows the operator to adjust the rotary cleaning action to accommodate different carpet conditions and cleaning requirements.
- Three Rotating Brush Assemblies: The rotary cleaning system uses three brush assemblies to agitate carpet fibers and help loosen embedded soil.
- Three Solution Spray Nozzles: Distributes cleaning solution during operation to assist with rinsing and soil removal.
- Three Vacuum Recovery Heads: Designed to recover cleaning solution and suspended soil during the rotary extraction process.
- Telescoping Handle: Adjustable handle height helps accommodate different operators and makes transportation and storage easier.
- Variable-Speed Control: Conveniently located rotary speed adjustment allows the operator to change cleaning intensity.
- Compatible with Heated Carpet Extractors: Designed for use with compatible professional hot-water carpet extraction systems.
- Carpet Pile Restoration: Rotary brush agitation helps lift and groom carpet fibers while loosening embedded dirt.
- High Productivity: Advertised cleaning capacity of up to 1,600 square feet per hour under suitable operating conditions.

Why Choose a Rotary Power Wand Instead of a Traditional Carpet Wand?

Steambrite Supply

Clean Storm 20261113 Rotary Pro 15" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor

Traditional carpet cleaning wands depend heavily on the operator to provide mechanical agitation through repeated forward and backward movements.
A powered rotary extraction wand adds motor-driven agitation to the cleaning process, helping loosen soil while the extractor simultaneously rinses and recovers dirty water.
This combination can reduce the amount of manual scrubbing required, particularly on heavily soiled carpet.
Advantages of Rotary Carpet Extraction

- Motor-driven agitation instead of relying entirely on manual scrubbing.
- Simultaneous carpet agitation, solution application, and extraction.
- Helps remove embedded soil from carpet fibers.
- Helps lift and restore flattened carpet pile.
- Adjustable rotary speed for different cleaning conditions.
- Wide 15-inch cleaning path for increased productivity.
- Telescoping handle for improved operator comfort.
- Suitable for residential and commercial carpet cleaning.

Product Specifications

Brand
Clean Storm

Model
Rotary Pro 15"

Part Number
20261113

Equipment Type
Powered Rotary Carpet Extraction Wand

Cleaning Width
15 Inches

Rotary Speed Control
10 Adjustable Speed Settings

Steambrite Supply

Clean Storm 20261113 Rotary Pro 15" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor

Brush Assemblies
3 Rotating Brush Assemblies

Solution Nozzles
3

Vacuum Recovery Heads
3

Handle
Telescoping / Adjustable Height

Cleaning Productivity
Up to 1,600 Square Feet Per Hour

Cleaning Method
Rotary Agitation with Hot-Water Extraction

Applications
Residential and Commercial Carpet Cleaning

Extractor Compatibility
Professional Carpet Extractors and Truckmount Systems, subject to equipment compatibility

Recommended Applications

- Professional residential carpet cleaning
- Commercial carpet cleaning
- Hotels and hospitality facilities
- Office buildings
- Apartment and rental property cleaning
- Restaurants and commercial facilities
- Heavily soiled traffic lanes
- Carpet pile grooming and restoration
- Routine carpet maintenance

Operating Tips
1. Vacuum Before Extraction
Remove as much dry soil as possible using a commercial vacuum cleaner before beginning wet extraction.
2. Apply Carpet Prespray
Apply a suitable carpet cleaning prespray and allow the recommended dwell time according to the chemical manufacturer's instructions.
3. Select the Appropriate Rotary Speed
Start at a lower rotary speed and increase the setting as needed for the carpet construction and soil conditions.
Always test an inconspicuous area before cleaning the entire carpet.
4. Clean and Extract
Operate the rotary wand using smooth, controlled movements. Allow the rotating brushes, solution nozzles, and vacuum recovery heads to perform the cleaning process.
5. Make Additional Vacuum Recovery Passes When Needed
Additional extraction passes may be necessary to remove excess moisture, depending on the carpet construction, extractor vacuum performance, and cleaning conditions.
6. Clean the Equipment After Each Job
Inspect and clean the brushes, spray nozzles, and vacuum recovery openings after use.
Remove accumulated carpet fibers, hair, and debris to maintain proper cleaning performance.
Frequently Asked Questions
Does the Clean Storm Rotary Pro 15" replace a traditional carpet wand?
Yes. The Rotary Pro is designed to perform carpet agitation, solution application, and vacuum extraction using one powered cleaning head.
Many professional cleaners may still prefer a traditional wand for stairs, tight corners, edges, and other areas where a larger rotary head cannot reach.
Does this machine require a separate carpet extractor?
Yes. The Rotary Pro is a powered carpet cleaning attachment. It requires a compatible carpet extraction system to supply cleaning solution and provide vacuum recovery.
It is not a standalone carpet extractor with its own freshwater and recovery tanks.
Can I use this with a heated carpet extractor?
Yes, provided the extractor's operating temperature, pressure, solution flow, and vacuum performance are compatible with the Rotary Pro specifications.
What is the advantage of the adjustable rotary speed?
The 10-speed adjustment allows the operator to change the amount of mechanical agitation used during cleaning.
Lower speeds may be preferable for more delicate carpet constructions, while higher speeds may be useful for heavily soiled commercial carpets when appropriate.
Will the rotating brushes help restore flattened carpet pile?
Rotary agitation can help lift and groom carpet fibers while loosening embedded soil.
Results depend on carpet construction, fiber condition, and the amount of permanent

wear or damage.
How much carpet can this machine clean per hour?
The advertised cleaning capacity is up to 1,600 square feet per hour.
Actual productivity depends on carpet conditions, furniture, cleaning procedures, equipment performance, and operator experience.
Can this machine be used on every carpet?
No. Always follow the carpet manufacturer's cleaning recommendations.
Some delicate fibers, specialty constructions, loosely attached carpet, and other sensitive materials may not be suitable for powered rotary agitation.
Important Safety Information

- Use only with compatible professional carpet extraction equipment.
- Always use properly grounded electrical connections.
- Keep electrical connections away from standing water.
- Do not operate the rotary brushes over loose electrical cords.
- Do not use aggressive rotary settings on delicate carpet fibers.
- Test carpet compatibility before beginning cleaning.
- Disconnect electrical power before servicing or cleaning the rotary head.
- Follow the manufacturer's operating and maintenance instructions.

Clean Storm Rotary Pro 15" - Part Number 20261113
A professional rotary carpet cleaning wand designed for carpet cleaning contractors seeking the advantages of powered agitation, adjustable cleaning speed, and simultaneous hot-water extraction.
Brand: Clean Storm
Model: Rotary Pro 15"
Part Number: 20261113
Cleaning Width: 15 Inches
Speed Control: 10 Adjustable Settings
Electrical Requirements 120 Volt AC, 60 Hz, 6 Amps Vacuum Hose Connection 38 mm (1.5" ID)

Availability: This product was added to our catalog on Monday 23 November, 2026
