Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Manufacturer: Clean Storm

Clean Storm 20170915 Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Special order, 2 - 3 month build time frame

The worlds strongest electric flood extraction machine!

Video below is of the baby brother model made with quad two stage 30 amp vacuum. This sku is for quad 6.6 vacs and requires four 15 amp breakers to operate. This is the performance for using 1/2 of this quad 6.6 machine.

Video above of the original smaller Goliath Heated Electric Truckmount Package

Goliath Quad 6.6 Trailer Mount
Quad Vac Flood pumper
The Industries Strongest Water Extraction Machine and Electric Pressure Washer Vacuum Recovery!
New Larger Waste Tank Size: 26 gallon (20" X 20" X 15" ID)
Body Construction: Fiberglass box for durability, capable of full steam pick up.
Vacuum Motors: Four 6.6 vacuums (will operate over 350+ ft of 2" vacuum hose!)
Vacuum motors are configured: each pair is in series and then both pairs are in parallel for the best of both worlds of high cfm and high inches of lift. Full 15" Hg Lift.
New Larger Flat Lid

Automation: 30 GPM STAINLESS STEEL sump pump with water level sensor (machines automatically dumps the dirty water as you clean for non stop production) Draws only 3.5 amps.

Features:

- Dual ball float/standpipe for increased air flow and vacuum performance.
- Water and vacuum tight hinged with gasketed reinforced lid.
- Quad 25 ft. 12-3 power cords

Steambrite Supply

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Factory Included Four Units
Extension Power Cord 25 ft 12-3 115 volt

- Circuit locator,
- Front mounted GFCI w/ waterproof cover.
- Built in Auto Defoamer with adjustment knob.

Factory Installed B112 1/8" Fip Screwed Bonnet Needle Valve 122440

- Dual cam lock waste water discharge - Garden hose for cleans and 1-1/2" dump hose for floods (your choice)
- Machine will operate on either one, two, three, or all four power cords (see below)
-

Factory Installed
Quad Clean Storm Fiberglass Vacuum Motor Manifold 20131023

This is the ONLY machine on the market that allows for steam and hot water vacuum recovery without the worry of traditional plastic manifold collapse.

- When optionally running just 2 of the vacuum motors, you have the option to run the vacuum motors in series or parallel. Build it air stack check valve prevents air traveling through the motors not in use.
- Made in the USA
-

Used to remove hair and carpet fibers from the water to protect auto pump out system

Steambrite Supply

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Factory Installed Water Resistant Rocker Switches: 2 Position On/Off - 4 pinned with built in dust and water cover

5 installed on this machine

One switch for each vacuum motor and one for the auto dump pump override.

• Technical Specification

- Primary cord (15.5 amps) runs (1) vac motor in air series with ball float shutoff and sump pump. If a secondary circuit is not available, machine would perform on this cord. Wired with an in-line GFI and cooling fan.
- Remaining three power cords (12.5 amp average) runs one each of the remaining (3) other vac motors in air series twin pair configuration.
- Twin 1-1/2" ball float shutoff with lint filtration.
- One vacuum stand pipe with check valve will let you run one, two, three or all four vacuum motors depending on how much electricity is available on the job site. One 120 volt power cord per vacuum motor.
- Single 2" vacuum intake.
- Garden hose cam lock adapter for carpet and tile cleaning for garden hose dirty water discharge
- 1-1/2" cam lock adapter for flood restoration (seen in photo below) for 1.5" diameter dirty water discharge.
- (5) Green lighted splash proof rocker switches.
- Blue tank/Gray base. Lids can be white or black. (current color black)
-

Steambrite Supply

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Factory Installed Quad (4) Ametek Lamb 122234-18 6.6 Vac Motor 120 volts

Note each vacuum motor is on it's own power cord using 12.5 amps of power

Twin series pair configuration
340 cfm
215" lift (15.8hg)
73,100 vacuum units
50 amp total vacuum system
(same performance of a 20 hp 36 blower gasoline truckmount)
Videos on Link

• Gallon of liquid defoamer can be set on top of extractor on jobs where you need to cut some suds. (auto dump systems only dump water and not bubbles)

Unit Measurements:

- Machine dimensions: 36"H x 16"W x 26.5" L (box is only 20" Long but barbed fitting on front is 3" and discharge is 3")
Side handles installed: W 21.25" x L 26.50 x H 36 - Weight (assembled) = 106 lbs. w/out cords. 114 lbs with cords.
This unit will ship with no wheels and no handle for permanent installation on a tongue or bed of a pressure washing trailer. Footprint on floor is only 16" X 20"

Goliath Advantages:
1. 26 gallon recovery tank
2. Auto defoamer needle valve means non stop production.
3. 2" vac port will run either 2" or 1-1/2" vacuum hose.
4. The highest inches of lift and highest CFM extractor on the market. Nothing comes close. This machine is impressive when it comes to suction. This machine will run longer hose lengths and dry carpet better than any other electric machine that is operating on four power cords. 50 amp total vacuum system @120 volt = 6000 watts vacuum performance!
5. Will operate on one, two, three, or all four 15 amp power cords.
6. Dual port water pump out discharge. Toggle back and forth between automatic

Steambrite Supply

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

dumping out a garden hose (for cleaning jobs) or out a 1-1/2" vacuum hose (water extraction jobs), your choice.
7. Switch plate cover will keep your water resistant switch covers in place. Unlike some other brands the clear water protection cover can fall off once the machine gets old or if it gets knocked around.
8. Fiberglass body is not affected by steam vacuum recovery as plastic housing get soft.
9. Easily converts into an air duct cleaning machine, tile cleaning machine, carpet cleaning machine, auto detail extractor.
10. Designed to work perfectly with electric converters and run on 15 hp (420cc) generators and larger.
11. New larger longer lasting carbon brushes and sealed bearing vacuum motors.

QUAD 6.6 VACUUM MOTORS IN SERIES/PARALLEL
AS PER MANUFACTURERS RECOMMENDATION, MOTORS ARE MOUNTED IN A WAY THE BALANCES THE VACUUM (lift) AND THE VOLUME (cfm), BY MOUNTING THE VACS IN SERIES PAIRS THEN THE PAIRS ARE MOUNTED IN PARALLEL. THIS BALANCES THE LIFT AND CFM, GIVING BETTER PERFORMANCE THAN HAVING ALL 4 MOTORS IN SERIES (high lift but nominal cfm) OR ALL 4 IN TANDEM (plenty cfm but wimpy vacuum). SO FAR ONLY STEAMBRITE MFG GIVES YOU THIS SUPERIOR DELIVERY SYSTEM FOR 4 VAC MOTORS.

Q&A:
Question: Will the machine operate on a customer's electric dryer plug?
Answer: Yes. This was the idea behind this machine. One plug to run just vacuum and auto dump. If you want to run a pressure washing pump, you will need to operate that pump on gasoline or throw another power cord to the porch or inside the building. An electric dryer plug will offer up to 60 amps @ 120 volts or 7200 watts but with power cord length, you have to allow for wire resistance. This is the reason for this design. We did not want to make this machine a 60 amp vacuum to allow for wire loss resistance. By making a 50 amp design allows you to run 75 feet of power cord to your machine.

Question: How large of a generator would I need to have to run this?
Answer: Any 420 cc (15 hp) generator will work. Example below BE9000ER. Please note when using optional generators you will need to also use the 240 volt plug with converters (NEMA L14-30R) or the L5-30R. If using a generator, please do not try to operate by just plugging into the 120 volt outlets (NEMA 5-15R) because it is important to pull electricity evenly out of both sides of the generator. Please make sure you properly ground your generator. See notes on how to bond your generator to the ground or building's ground.

Question: What is involved in switching between using one power cord to two cords, to three power cord, and then to use all four vacuum motors?
Answer: Nothing! We have a check valve installed on one of the vacuum stacks. This way if you are only using one power cord it shuts off the stack you are not using to prevent air from sucking backwards through the system. When you are using as a dual corded machine, you have the option to use in air series or air parallel by simply just turning on the two vacuum motors you want. Because each power cord will operate on 15 am breakers, it plugs in everywhere. No need to pre-qualify if the outlet is a 20 amp breaker.

Question: Does the machine include the bubble top lid or the flat lid?
Answer: The flat lid. The bubble top lid are some photos that carried over from the 20 gallon model. All the 26 gallon machines have flat lids with a twist and lock latch.

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Testimonial:

"I wanted to let you know how pleased I am with you recommending the Goliath 6.6 quad vacuum recovery and the
be9000 watt generator. I did a basement flood job that was approximately 4 inches deep on the concrete. I thought I would be there all day but the Goliath had the water out and job done in 1-1/2 hours! The Goliath will really pump 30 gal. a min like its stated on your web site. I highly recommend the Goliath. Thanks Gary Lindbom"
garyscarpetclean.com

"Vacuum is awesome! I love the automatic flood pumping ability. I have worked with the Boxxer 427 for many years and found my Goliath Quad 6.6 feels stronger to me!"
https://superior-carpet-cleaning-texas.com/

Testimonial:
"I used the Goliath Quad 6.6 to perform a tile cleaning service using the TH15 spinner wand and the Clean Storm 6720 pressure washer.
The job site required me to leave the machine on a higher floor than the surface being cleaned.
With the pressure washer set at 1700 psi and applying the water with dual 02 jets using the TH15 spinner wand
Cleaning one and two floors below the Goliath I only needed to run two vacuum motors to pick the water straight up vertically 24 ft and over horizontally 100 ft. using 150 ft of 2" ID vacuum hose.
Cleaning 3 and 4 floors straight up (48 ft) and over 100 ft, I used 3 vacuum motors.
Cleaning 5 floors (60 ft) straight up plus 100 ft. horizontally, I ran all 4 vacuum motors and it worked perfectly!"

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

Comparison pressure washer comparison notes for chart below:
CFM mean cubic feet per minute that passes through the vacuum at zero inches of lift at sea level (Unrestricted)
Inches of lift means: how height can you suck a 1" diameter column of water straight up in the air above seal level when the CFM reaches zero. (Complete occlusion)
Inches of HG (mercury): Mercury is the heaviest liquid metal on Earth so this liquid is not picked up near as high as water.
1 inches of HG = 13.6087 inches of water lift
Vacuum units: Formula Max CFM (at zero inches of lift) X (Times) Max inches of lift (at zero CFM)
Amp draw or HP (Horse Power): Watts divided by Volts equal amps. Amp draw is king. Machines that use more power just perform better.
If you find any miss information, please email us and will will correct this web page.
Correction are not made based on phone calls
Some multiple cored electric vacuum require all power cords to be plugged in to work, others machine allow you to chose to use as much or little vacuum needed.
Equipment below is not in any order.
If you know of a machine that you want added in this chart, please email us.

Clean Storm 20170915, Goliath Quad 6.6 Trailer Mount Flood Pumper 26gal Pressure Washer Vac Recovery 120v Filtration

2 power cord Electric

Summary and side notes:
I probably should have added an extra column that was vacuum units divided by dollars spent = performance per dollar or value per dollar
Examples
Goliath Quad 6.6 20170915 is 73,100 divided by $2899 = 25.2 vacuum performance per dollar spent.
or
US Products Flood King 15,500 divided by $2734 = 5.67 vacuum performance per dollar spent.
You can do the math on the rest of the units...
I could have added a column for the vacuum waste tank size but since they are all auto pump out it really does not mater.
Max CFM you can even suck through a 1.5" diameter hose 225 cfm
Max CFM you can suck through a 2" diameter hose is 450 cfm so this reduces the Sapphire 72-4500BB on single wand use.
