HydraMaster 000-163-759 Evolution Stair Wand 10 inches

The new Evolution Stair Wand has a rotationally molded head, Delrin® Glide, and is a wand designed to clean stairs and other hard to reach places.
It comes with a 10" head and has a single jet.
The Evolution Stair Wand is lighter and more durable than stainless steel stair wands and tools.
Through laboratory testing, the Evolution Stair Wand was designed to smooth airï¬‚ow and boost water recovery performance.
A rotationally molded head and aircraft aluminum tube make the Evolution Stair Wand lighter than most other stair wands or tools and more durable.
The Evolution Stair Wand was designed with an ergonomically angled wand tube for fatigue reduction.
The laminar like airflow design improves airflow, increases extraction performance, and reduces drying time; plus leaves less residual moisture.
The Delrin® glide is mounted to the rotationally molded head for airtight fit and no slippage.
A brass check valve/stainless steel Inline filter with brass quick-connect prevents clogging and is easy to clean out.
Made in the USA.

About the EVOLUTION Wand Technology
HydraMaster took wand and tool design to the next level with the development of the technology with the Evolution Wand Series. Using a copolymer process to rotationally mold cleaning wands has resulted in tools that are lighter, more durable, and outperform traditional stainless steel wands and tools. Through scientific testing, the Evolution Wand series was developed to smooth airflow and boost water recovery performance through laminar airflow design. Side by side comparative testing of the 1.5” Evolution Wand against many of the other types of wands available resulted in ½ of the residual moisture per square foot, and has shown unmatched performance versus any other type of wand.
The rotationally molded wand heads and aircraft aluminum tubes make the Evolution

Steambrite Supply

Wand Series nearly half the weight as comparable stainless steel wands and tools. Evolution wands and tools are custom fitted with a Delrin® acetyl glide with a glide holder that is molded or mounted to the wand or tool head for an airtight fit. Many aftermarket Teflon glides used on traditional wands are designed to fit a wide variety of tools and often don’t fit well and slip and slide off. The Delrin® glides are especially matched to the glide holder on each Evolution Wand giving it an airtight seal and making it easily replaceable.
Now the full line of Evolution Wands and tools provide the professional cleaner and restorer with a wide range of problem solving and quick drying options whether using a truckmount or portable extractor, doing water damage and flood extraction, cleaning hard surface floors, or taking care of fine upholstery.
