Dri-Eaz presents the
GE Protimeter MMS Plus
Moisture Measurement System + Logging
NEW — Full Range RH!
Measures 0-100% RH and 32-122ºF with new Humistick™ probe (also compatible with Hygrostick™ probe)
Three meters in one
The complete meter package! The MMS Plus system combines three different meter functions into one convenient unit, plus it serves as a data logger. It's a revolutionary tool, one that's ideal for the restorer that wants to update to an all-in-one system.

Hygrometer Mode
Measures the relative humidity, temperature, dewpoint, proximity to dewpoint, and grains per pound (GPP) with the modular, replaceable Protimeter Hygrostick™.

Pin Measure Mode
Use the penetrating pins to determine the moisture content of wood and the Wood Moisture Equivalent (WME) value of other building materials. Add an optional Hammer Electrode to increase versatility.

Pinless Measure Mode
Uses non-invasive radio frequencies to detect the presence of moisture without damaging materials.

Data Logger
Stores up to 1,000 results (with date and time stamp) for downloading to your computer. Allows you to keep clear records of drying conditions that help to safeguard your business and protect your customers.

We want to continuously provide the best products and services to you, our customer. As part of our ongoing commitment to offering the best tools and support possible, we have launched some enhancements to our Return Material Authorization (RMA) online tool for Protimeter products.

Adding to the fast response, improved visibility to returns and ease of doing business with GE, the following enhancements are available beginning on April 9th, 2012:
