2. Mount securely as shown in the mounting detail.

MOUNTING DETAIL

Operation

Connecting Hose to Reel

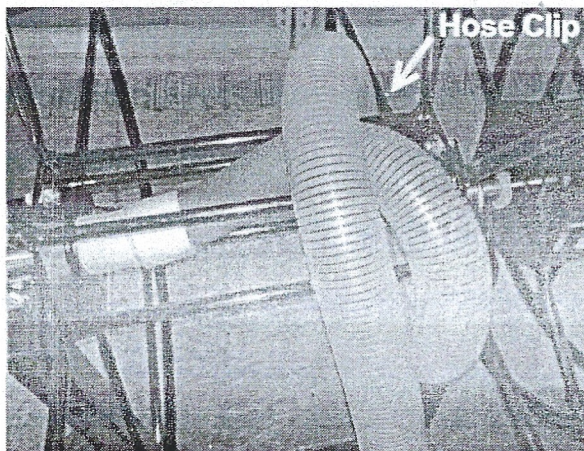

1. Place hose through hose clip.
2. Wrap hose around hose reel, keeping tension on the hose, place all wraps snugly against previous wrap.

Connect Hose Reel (Live Hose Reel)

1. Connect the hose to the large tube, opposite the hose clip.
2. Rotate the reel so that the hose is stored on top of the reel as you rotate it away from yourself.

NOTE: The hose is wrapped and secured against the side of the reel.

3. Continue to wind hose, keeping tension on the hose. Keep hose as small as possible, allowing the hose to gather from right to left.
