#### 1. Introduction

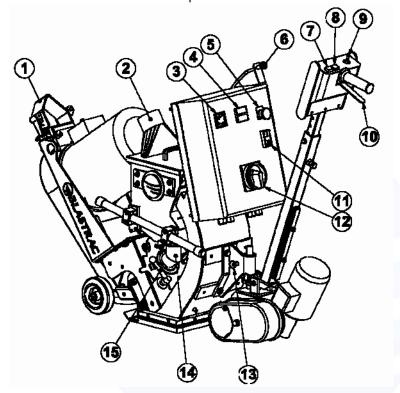

It is important that all persons who are working with or maintaining this machine must read the manual carefully and understand it fully. Keep this manual near to the machine, to enable it be referred to at any time

Only authorized and trained personnel may operate this machine.

## 2. Machine description

The **Blastrac** blast cleaning machine 1-8DPS Global is a downward blasting machine with a closed abrasive circuit designed for the pre-treatment of horizontal surfaces. The bouncing impact of metallic abrasive onto the surface to be treated thoroughly removes surface contaminants, coats of paint, sealants and thin coatings.

A suitable filter unit must be connected to the machine in order to separate the dust from the abrasive. A specially designed dust collection system ensures dust-free operation of the machine and clean air at the workspace.

- 1 Hose and cable clamp
- 2 Dust hose connection pipe
- 3 Ammeter blast motor
- 4 Hour counter
- 5 Emergency shutdown
- 6 Abrasive control cable
- 7 Overdrive
- 8 Move forwards
- 9 Speed control
- 10 Travel switch
- 11 Blastwheel On/Off
- 12 Main switch

- 13 Quick release pin
- 14 Feed spout
- 15 Clamp lever for cage adjusting

5/12

### 3. Safety

Before operating the machine, the personnel must be familiar with the safety instructions given in this manual.

Keep this manual near to the machine, so it can always be consulted.

#### Safety precautions

The surface to be treated must be swept clean to remove stones, screws etc.

Never use the machine when the surface is not clear and if there is a risk of tripping.

Make sure there is not any water on the surface to be treated.

Don't get disturbed during the activities.

Remove any trailing electrical cables and or dust hoses from the surface to be treated.

Always switch on the dust collector.

#### Safety regulations

Persons who do not operate the machine are not permitted to stay in the surrounding of the machine. Don't leave children anyway.

Keep the machine original; Use cables who are approved and not damaged. Never remove the earth connecting of the supply cable and machine. Use only cables with earth wire and connectors with a earth connecting.

Connect main power supply cable to a installation with a earth leakage circuit breaker.

Inspect and test the electrical components of the machine regularly. This electrical components have to satisfy to the requirements EN60204-1.

Always call a skilled electrician when you have questions about the safety of the electrical components.

Work on electrical equipment or operating materials may only be undertaken by a skilled electrician or by trained persons under the guidance and supervision of a skilled electrician as well as in accordance with the electrical engineering regulations.

Pull out the main plug during inspections and repairing on the machine.

Never operate the machine when workplace is wet.

Never stay in the rain with the machine.

6/12

The following sticker is placed on the machine.

Meanings of these symbols are:

Ear protection is obliged

Safety glasses with lateral protection are obliged

CE-mark on this machine

Safety shoes obliged

Consult the manual before operating the machine

Personnel must tie back long hair and not wear loose clothing or jewellery including rings. Wear gloves and dust mask during operating the machine.

### Safety instructions

Abrasive can escape from the sides of the blast head at high speed. Wear safety glasses with lateral protection and close-fitting protective clothing.

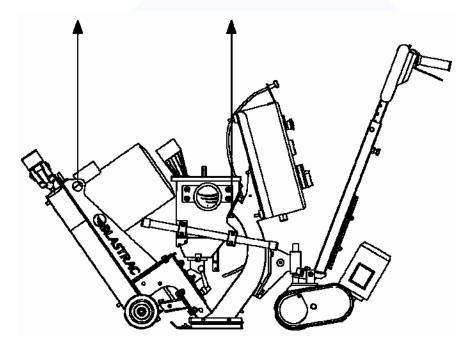

Be very careful with inserting the quick release pin

The machine, specially the handle grip must be free of fats and has to be dry.

The dust container / bag of the filter unit must be emptied regularly. Comply with the local waste treatment regulations considering the removed material.

The weight of the 1-8DPS Global is 155 kg. By transport the machine with a crane or lift, use the lifting eyes of the machine.

Pay attention that the drive unit do not turn away during lifting the machine.

7/12

### 4. Initial operation

Before using the machine it is of great importance to inspect the machine. It is not permitted to use the machine if the machine safety is not according the checkpoints below.

#### **Checkpoints power supply**

Use only extension cables for extending the main cable that are sized and marked in accordance with the overall power consumption of the machine.

Electrical cables must be fully unwind of them reels.

No damage is permitted for electrical cables.

Use a electrical power supply connection with earth connecting.

#### Checkpoints of machine

Safety functions and operating functions must work correct.

Check the following parts for damage and wear: blastwheel, feedspout, liners, magnet- and brush sealing.

No loose bolts and nuts permitted

No any damage of electrical components permitted.

Dust hose must be undamaged and the connection must be reliable.

Check de parts of the separator on wear and defects. Remove foreign bodies and dust deposits.

8/12

### 5. Operating

During operating the 1-8DPS Global, the following additional safety instructions must be followed closely.

#### Before switch on

Check if the distance from magnet to the floor is 8-10 mm. Check this height with aluminium strips.

Check the distance from brush sealing to the floor. This may be max. 1 mm. Fill the separator equally with the selected abrasive up to the bottom of the separator tray. The magnetic valve must be closed whilst doing this. Connect the blast machine and filter unit with the dust hose. This connection must be reliable

Connect the power supply cable of the filter unit with the generator. Be sure that electrical power supply is correct.

#### Switch on the machine

Before switch on the blast machine, switch on the filter unit.

Press the green push button "Blast wheel ON" and check the rotating direction of the blast motor. The correct direction is given with a arrow on the housing of the motor.

Select the speed using the speed control knob. (item 9 of machine description) When the machine is traveling pull the abrasive control cable to open the magnetic valve. Observe the ammeter. It may indicate the full load amperage. After having blasted aprox. 2 m, close the abrasive valve, stop the machine and check the blasted surface.

If the 'hotspot' is too much on the right, turn clockwise the blastwheel cover a little bit. Loose the clamp lever for cage adjusting (item 15 of machine description) and hammer on the finger to adjust the position. Tighten the clamp lever after adjusting.

#### Switch off the machine

Close the abrasive valve

Press the red button "Blast wheel OFF"

Press the red button "Drive OFF"

Switch the main switch to position "OFF"

Pull out the connector of the main power supply of the machine.

Switch off the filter unit.

Wait for standstill of all drives before any inspection or maintenance works are started.

### 6. Maintenance

#### Changing the liners

Loose the press bolt of the top liner and remove the cover.

Loosen the nuts of the side liners and plenum liner. Take them out at the bottom of the housing.

To mount the liners, keep on the following sequence:

First place the plenum liner and fix it with the nuts.

Place the side liners inside the housing. The sideliners may stick out the body for max. 1mm. Tighten the nuts.

Place the top liner in the housing and make sure that the top liner sits close to the edges of the side liners.

Place the cover and tighten the bolts.

Tighten the pressure bolt of the top liner slightly and press the top liner against the side liners.

#### Changing the tune-up kit

De tune-up kit consists of the blastwheel, the cage and a bolt.

Remove the feed spout

Remove the cage clamps

Remove the cage and blastwheel cover plate

Block the blastwheel and remove the central fixing bolt

Take the blastwheel out of the housing

Use a new central fixing bolt when mounting a new blastwheel

Place the blastwheel on the hub and tighten the central fixing bolt.

Fix the blastwheel cover plate with 3 nuts and clamping handle.

Insert the control cage in the center and clamp the cage with the control clamps so that the blastwheel can rotate freely

Turn the blastwheel manually. It must rotate freely.

Place the feed spout between the abrasive valve and the cage.

Clean the machine every day with air and non-aggressive materials. Never use a high pressure water cleaner to clean the machine.

Store the cleaned machine in a dry room. Protect the electrical motor from moisture, heat dust and shocks. Remove the abrasive out of the abrasive storage hopper.

All repair work has to be done by qualified Blastrac personnel, this guarantee a save and reliable machine.

Any guarantee on the machine is expired when:

By not using original Blastrac spareparts and abrasive.

When repair work is not done by qualified Blastrac personnel.

When changes, add ons or conversions are undertaken without written permission of Blastrac.

#### 7. Selection of abrasive

#### Media nr. 2

Is often used when the surface is only subsequently sealed.

- creates fine profiles, e.g. on vacuum concrete and non-glazed tiles
- removes thin layers of rust on steel surfaces
- removes thin layers of paint

#### Media nr. 3

- creates a fine to medium texture on concrete.
- removes glazing from tiles prior to subsequently coating with antiskid floor sealings
- removes old impregnations and coatings about 1 mm thick

#### Media nr 4

Standard abrasive, suitable for about 50-60 % of all applications. Creates a medium profile on concrete. Fulfils the same purpose as Media No. 3 when a higher speed of the machine is required, e.g. on asphalt, in order to keep the thermal load low.

- removes laitance from new concrete
- roughening of smooth concrete or natural stone
- removes coatings with a thickness of 1-3 mm
- cleaning of steel surfaces

#### Media nr. 5

This media is used to create a coarse profile or to increase the work speed in the case of surfaces hard to treat.

- removes sediments on concrete prior to coating
- removes thick paint coatings or rust from steel surfaces, bridges, tanks, etc.
- removes flexible coatings on parking house decks
- removes road markings and retexturing of asphalt and concrete roads

#### Media nr. 8

Only as an addition to Media No. 3, No. 4 and No. 5 with maximum 30% content. Media No. 8 should never be used without blending since otherwise the wear in the machine as a whole would increase disproportionately.

- removes polyurethane coatings
- removes adhesive remnants
- removes rubber deposits
- penetrates coatings hard to remove
- also suitable to be used on steel for extraordinary roughness

## 8. Technical data

	1-8DPS Global
Power	3KW
consumption	5.5kW
blast motor	7.5kW
Electrical	230V SF 50/60Hz
connection	400V / 50Hz
(voltage is given	400V / 60Hz
on the control	
box)	
Blast width	200 mm
Drive speed	0 – 23 m/min
Length	1700 mm
Width	380 mm
Height	1050 mm
Weight	155 kg
Noise level	85dBa
(under load)	
Vibration level	1.6 RMS
	Allows 18.8 hrs. of working
	with the mentioned equipment
	without having to use anti
	vibration precaution measures.
Dust hose	Ø75 mm
connection

## **Product Warranty**

### **Standard Equipment Products:**

Blastrac warrants its Blastrac Standard Equipment Products against defects in quality of material and workmanship, under normal and proper use for a period of **1 Year** from the date of delivery, as noted on the returned warranty registration card, or, in the case of **Rental Fleet Machines**, **180 Days** from the date of assignment to Rental Fleet. This warranty is nontransferable and is extended to machines purchased and entered into the normal service of surface preparation by a recognized professional or qualified contractor. Blastrac makes this warranty only to the buyer who purchases the products directly from Blastrac or its Authorized Distributor. This warranty does not include expendable parts such as, but not limited to, blades, blast wheels, wear plates, liners, seals, and electrical components. All purchased parts utilized in the manufacture will be honored to the original manufacturer's specified warranty.

If the buyer does not return the warranty card or register the product online at www.blastrac.com within 30 days after taking delivery of Blastrac Standard Equipment Products, the warranty period is limited to 6 months from the date of delivery noted on shipping receipt.

#### **Hand Tool Products:**

Blastrac warrants its BLASTRAC Hand Tool Products, including hand grinders and accessories, against defects in material and workmanship under normal and proper use for a period of **90 days** from the date of delivery or, in the case of Rental Fleet Machines, from the date of assignment to a Rental Fleet. Blastrac makes this warranty only to the buyer who purchases the products directly from Blastrac or its authorized distributor. This warranty does not include expendable parts such as blades.

If the buyer does not return the warranty card, or register online at www.blastrac.com within 15 days after taking delivery of Blastrac Hand Tool Products, the warranty period is limited to 30 days from the date of delivery noted on shipping receipt.

#### **WARRANTY TERMS AND CONDITIONS:**

- **1.** Blastrac's obligation under this warranty is limited to the replacement or repair, at Blastrac's option, of products and does not include, labor, the cost of transportation, loss of operating time, or normal maintenance services.
- 2. This warranty does not apply to failure occurring as a result of abuse, misuse, negligence, corrosion, erosion, normal wear and tear, alterations or modifications made to products without the express written consent of Blastrac.
- **3.** The buyer must submit all warranty claims no later than thirty (30) days after buyer becomes aware of the basis for any such claim, or should have become aware of the basis for any such claim in the exercise of reasonable diligence.

To return parts for warranty consideration, please call Blastrac Customer Service at 800-256-3440. Your customer service representative will obtain the necessary information to complete the Blastrac Returned Merchandise Authorization (RMA) Form. Blastrac will then send the RMA form to the customer authorizing the return of the parts for warranty evaluation. The parts must be received within sixty (60) days following the RMA origination date or the warranty claim will be denied. Once the parts are received they will be evaluated for warranty.

If the customer cannot wait for the evaluation/replacement of the parts during this process, the customer must issue a new purchase order to Blastrac for the replacement parts before they can be shipped. Once the evaluation process is complete and parts are deemed a valid warranty claim, a credit will be issued against this invoice.

- **4.** The buyer may not return Blastrac products without written authorization to do so through a Blastrac RMA.
- **5.** Blastrac reserves the right to inspect and determine the scope of its warranty responsibilities for any returned Blastrac products.
- **6.** Blastrac makes no warranty with respect to accessories it does not manufacture, including but not limited to, engines, motors, batteries, tires and all other parts. See component manufacture warranty.
- **7.** Blastrac reserves the right to make product changes or improvements without prior notice and without undertaking any obligation for such changes or improvements on previously sold products.
- **8.** The above warranty conditions can only be altered by Blastrac. Blastrac must confirm alterations in writing for each specific transaction.
- **9.** Blastrac reserves the right to modify this warranty for used or demo products on an individual transaction basis. Blastrac will include warranty modifications on its invoices for used or demo products.
- **10.** BLASTRAC DOES NOT AUTHORIZE ANY PERSON, REPRESENTATIVE, SERVICE OR SALES OUTLET TO MAKE ANY WARRANTY DIFFERENT FROM THIS PRODUCT WARRANTY.
- 11. EXCEPT FOR ITS PRODUCT REPAIR OR REPLACEMENT OBLGATIONS DESCRIBED IN THIS PRODUCT WARRANTY, UNDER NO CIRCUMSTANCES SHALL BLASTRAC BE LIABLE TO THE BUYER, OR ANY OTHER PERSON, FOR ANY DIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THE BLASTRAC PRODUCT, OR FOR ANY SPECIAL OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER, INCLUDING WITHOUT LIMITATIONS, DAMAGES FOR ANY LOSS OF GOODWILL, WORK STOPPAGE, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES.
- **12.** BLASTRAC MAKES NO OTHER PRODUCT WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

## **IMPORTANT!**

#### TO THE DELIVERING DISTRIBUTOR OR END USER

To ensure the proper warranty coverage is extended to the owner of this machine, fill in the necessary information below **COMPLETELY** and **ACCURATELY** and retain for your records. **Go to www.blastrac.com and register online.** Click on the Register icon in the left column of the homepage, and fill out the product registration form with the same information that will be recorded here.

## The warranty period will start upon the delivery date of the machine.

The distributor or the end user must provide the machine warranty information when the machine is delivered. Registration of the machine will extend the warranty period from the recorded delivery date entered with product registration. Failure to comply will make any and all warranties on the equipment void after 6 months.
