Super Pumpout System 110

Automates waste tank pump-out for faster, more convenient extraction

The SPS 110 is set up in the vacuum line between the extractor unit – either a truckmount or a portable – and the extraction tool. Water, dirt and debris drawn through the line are captured in the SPS, which automatically pumps itself out through the high capacity discharge outlet. The SPS has a capacity of 90 gallons per minute, which means it can keep pace with even the largest extraction systems on the market. Meanwhile, very little moisture reaches the tank of your extractor, keeping it clean and operating at maximum efficiency.

Product Features

Item #F445
\$2,590 Suggested List *U.S. Funds*

Product Specifications

Pumpout capacity	Up to 90 GPM
Pumpout type	Fully automatic
Construction	Quick release folding handle, stainless steel filter basket
Dimensions (W × H × D)	34 × 18 × 26 in. (with handle folded)
Weight	80 lbs. 36.3 kg
Warranty	2 year parts, 2 year labor
