

# Versacarpet

## The Total Floor VersaCarpet™ Starter Kit

This Starter Kit will provide you with everything you need for use with the VC700 machine.

## Become a Cleaning Hero!

### VersaCarpet Step 1 HD

**Heavy duty traffic lane cleaner.**

With a ready-to-use pH of 10.6 and superior effectiveness on heavily soiled carpets, Step 1 HD stands out among traffic lane cleaners. The product's unique array of surfactants and solvents enable it to clean as effectively as aggressive cleaners without the risks associated with harsher alkalinity. Step 1 HD detaches even tightly-bound particulates from carpet piling and suspends them for removal. VersaCarpet Step 1 HD has a fresh, clean fragrance.

No need to measure or dilute. Simply plug the product container into the VC700 fitting and then prespray the carpet using the onboard spray wand. Follow with rinse extraction using VersaCarpet Step 2. VersaCarpet Step 1 HD is not recommended for use on natural fibers or stain resist carpeting.

Color coded: **PURPLE**

**TO REORDER:** 76-550; case of 12 × 1 quart bottles

### VersaCarpet Step 1

**Prespray for routine use on carpet and upholstery.**

VersaCarpet Step 1 is for routine cleaning of lightly to moderately soiled carpeting. Step 1 generates zero foam, zero odor, so you will not get complaints even in occupied areas. Step 1 dries to an easily vacuumed residue so resoiling is never a concern.

Plug the Step 1 bottle into the VC700 inlet, pre-spray with the onboard wand and extract using VersaCarpet Step 2.

Color coded: **GREEN**

**TO REORDER:** 76-460; case of 12 × 1 quart bottles

### VersaCarpet Step 2

**Low-foam carpet cleaning detergent.**

Designed for use as an in-tank detergent, VersaCarpet Step 2's extremely low foam characteristics enhance efficiency and productivity of the VC700 system. You will need no foam control unless there are significant residues from a prior cleaning. Step 2's encapsulation properties capture additional soils, easily removed by follow-up vacuuming.

No need to dilute. Attach Step 2 to the VC700 inlet tube and the machine automatically dilutes the product during the rinse extraction process.

Color coded: **BLUE**

**TO REORDER:** 76-470; case of 12 × 1 quart bottles

### VersaCarpet Step 3

**Moderately acidic, encapsulating rinse.**

VersaCarpet Step 3 neutralizes excess alkalinity left from prior cleaning. It also leaves fabrics at a moderately acidic pH so that texture and softness is enhanced. Step 3 generates no foam and no odor so it is ideal for use in cleaning synthetic upholstery fabrics.

Again, no need to dilute. Just plug into the VC700 and rinse through the rotating extraction head or through the onboard upholstery tool to remove soils and leave a soft feel to the fabric.

Color code: **YELLOW**

**TO REORDER:** 76-480; case of 12 × 1 quart bottles

**BE SURE TO READ LABEL AND MSDS FOR EACH PRODUCT PRIOR TO USE.**
