

AXIAL FAN

The **X-41ATR** and **X-42ATR** use high torque, external rotor induction motors to produce 3600 CFM with only 2.4 AMP draw and low noise level. Its unique variable speed control feature allows precise airflow control, while a special grill design extends the focused airflow up to 60 ft. The included stand allows a 360° fan rotation for multiple drying positions. The durable, lightweight, stackable ABS housing ensures easy transport and storage. Both units have a daisy chain function with circuit breaker. A ducting hose and adapter kit are available for confined space ventilation as well as other restoration uses.

The **X-42ATR** is a high temperature fan designed specifically to withstand room temperature up to 180°F for pest control applications, such as bed bug extermination.

The **X-34AR** and **X-34TR** are the most compact, energy efficient and durable high performance axial fans on the market today with only 1.6 AMP draw and 1700 CFM. The motors are sealed for professional water damage industry. Its unique variable speed control feature allows precise airflow control, while a special grill design extends the focused airflow up to 80 ft. The included stand allows a 360° fan rotation for multiple drying positions. The durable, lightweight, stackable ABS housing ensures easy transport and storage.

The X-34AR comes with a built-in power outlet for daisy chain feature while the X-34TR has a timer switch for intervals up to 3 hours, or can run continuously.

FEATURES AND ACCESSORIES

STACKABLE

360° ROTATION

DAISY CHAINABLE

**DUCTING HOSE & ADAPTER KIT
(FOR X-41ATR & X-42ATR ONLY)**
