

HUSQVARNA HIPERSEAL

A water based sealer specifically developed to enhance protection against topical harsh spills and chemical attacks.

HIPERSEAL is a water-based silane modified acrylic sealer that forms a microscopic semi-topical barrier that not only reduces the penetration of aqueous liquids, grease, oils and other dirt but also helps protecting the surface from stains and etching due to harsh spills.

The acid sensitivity on concrete surfaces will be reduced by Hiperseal, but depending on the length of the exposure time and the aggressiveness of the chemical, etching marks might still occur.

Hiperseal is applicable to all kind of concrete surfaces, screeds and artificial stone/terrazzo. Specific areas of usage are e.g. where the surface needs to be closed and withstand etching stains from for example food spill, or when there are exposed steel fibers in the concrete that you would like to protect from water and corrosion.

ARTICLE NUMBERS

Article no.	Description
586 91 64-05	HIPERSEAL 20 L EU

- Easy to apply. Fast drying (fully dried within 2-5 hours).
- Breathable (diffusion open)
- UV stable, will not yellow.
- Non-flammable. Non-toxic. Low odor.
- Consumption rate for polished concrete: approximately 20 m² / liter
