

IAQ 7000

AIR SCRUBBER

Whether scrubbing air or evacuating as a negative air machine, the Viking IAQ 7000 is the most powerful, dependable, cost efficient air scrubber in it's class to date! Drawing a mere 2 amps and delivering over 700 CFM this true HEPA filtration system is a power house. We surveyed and listened to the wants and needs of independent contractors. With two models to choose from your needs are met again with Vikings flexibility. Whether you want variable speeds, or a battleship hardened unit with a two speed rocker switch, either unit allows you to change filters without the use of any tools. We also made them 4 wheel drive.

While costing less than the two top selling 500 CFM machines, it rents at "Xactimate" WTRNAFAN> leaving Vikings famous return on investment unrivaled.
