

SPEED DRY CARPETS

THE NEW TRADEWIND AXIAL FAN PRODUCES UP TO 3000 CFM, AND IS PERFECT FOR WATER DAMAGE RESTORATION AND CARPET DRYING. THE MOTOR FEATURES 2 RUNNING SPEEDS, ALLOWING YOU ALMOST UNLIMITED VERSATILITY. OPTIONAL ACCESSORIES INCLUDE MULTI-POSITION STAND, LUGGAGE STYLE TRANSPORT HANDLE, AND CASTERS FOR “FACE DOWN” CARPET DRYING.

3000

TRADEWIND™ AIRMOVER

With the
TRADEWIND™
—you’ll enjoy these
MYTEE advantages:

VERSATILITY

The Tradewind can be used for drying carpets, tile, drywall, hardwood floors, baseboards, ceilings, and more. With the optional caster kit (item #3001), it can also be used for face-down center of the room drying.

PERFORMANCE

The Tradewind puts out over 3000 CFM on the high speed setting, giving you all of the power you need to tackle large jobs. The optional drying stand (item #3002) allows it to be used for drying in eight different positions.

EFFICIENCY

On high speed, the Tradewind uses only 2 amps of power on a standard 115 Volt circuit. The blower features a built in daisy chain outlet, which allows you to run up to 6 airmovers on a single 15 Amp power circuit. Drop the amp draw even lower by utilizing the low speed setting

SAFETY

At Mytee, safety is built in! The power cord is a bright safety yellow for visibility. The airmovers have built in circuit breakers to prevent the house circuit from tripping, as well as a GFI outlet to protect against unexpected power spikes or shorts.

CONVENIENCE

The Tradewind features a space conscious design, which allows the units to be stacked either vertically or horizontally. Additionally, the optional transport handle (item #3003) can be used to easily wheel the airmover from job to job.
