

# The *GreenFix* from Cleanfix

## Restoration & Maintenance Program for Tile-and-Grout

A green, step-by-step process for restoring and maintaining tile, grout and stone floors and surfaces.

- Oder-free & hypoallergenic
- No sticky soaps or detergents
- No butyls, solvents or VOC
- No enzymes or bacteria
- No bleaching or oxidizing agents
- Nonflammable
- Nontoxic
- Biodegradable

Powerbrush for scrubbing without bending over or kneeling down for those really hard-to-reach areas, baseboards, walls, fixtures and for detailing.

Applicator with onboard proportioning system for tile-and-grout chemical that allows to simultaneously work the chemical into the grout.

Compact, automatic scrubber for tight areas for cleaning, rinsing and removing released soil leaving floors clean and dry.

Compact, cylindrical scrubber with restorative brush action for open areas for restoring, cleaning and removing released soil.

Steam-extraction cleaner with built-in vacuum recovery for periodic sanitizing of bathroom floors, walls and fixtures.

SCRUBBY

FLOOR MAC

PARROT

PENGUIN

FIREBIRD

# PART 2 - the Process

## PREPARATION

1. Remove loose soil such as pieces of paper towels and tissues, food particles, dirt, dust bunnies etc. using a dust mop, sweeper or vacuum cleaner depending on size and layout. FOR BEST RESULTS MAKE SURE SURFACES ARE DRY TO ALLOW MAXIMUM CHEMICAL PENETRATION.

## FLOORS

2. Apply Cleanfix Tile, Grout & Stone Cleaner
  - a. using Cleanfix FloorMac: 2 oz. per cup: release small amounts of solution in front of brush and work in chemical throughout the floor to be cleaned (Tip: Don't let chemical dry)
  - b. using Cleanfix Pump-up: 16 oz. per gallon: lightly mist solution throughout floor and hard-to-reach areas (Tip: Don't let chemical dry)
  - c. Work in solution on floor using the Cleanfix FloorMac
  - d. Work in solution on hard-to-reach areas (around fixtures and/or commodes) using Cleanfix Scrubby
3. Allow for 2 minutes dwell time and let the solution do its job
4. Rinse and remove released soil
  - Small areas: Use Cleanfix Parrot
  - Large areas: Use Cleanfix PenguinFill machine with water
  - a. Using the machine dispense water and scrub floor briefly
  - b. Drop squeegees and recover soil from floor(Tip: Use spray lance to rinse hard-to-reach areas and floor squeegee or squeegee attachment to recover soil.)

## WALLS ETC.

2. Apply Cleanfix Tile, Grout & Stone Cleaner using Cleanfix Pump-up: 16 oz. per gallon lightly mist solution on walls etc. (Tip: Don't let chemical dry)  
Work in solution on walls etc. using Cleanfix Scrubby
3. Allow for 2 minutes dwell time and let the solution do its job
4. Rinse and remove released soil
  - Small areas: Use Cleanfix Parrot
  - Large areas: Use Cleanfix PenguinFill machine with water
  - a. Rinse walls etc. using the spray lance with either machine
  - b. Remove soil using a foam squeegee to push/pull soil down on the floor
  - c. Use Cleanfix Parrot or Cleanfix Penguin to remove soil from floors
  - d. Continue with "FLOORS" (see above) if desired

## PERIODIC BATHROOM SANITIZING

2. Apply Cleanfix Tile, Grout & Stone Cleaner using Cleanfix Pump-up: 16 oz. 4 per gallon lightly mist solution throughout floor, hard-to-reach areas and walls etc. (Tip: Don't let chemical dry)  
Work in solution on floor using the Cleanfix FloorMac  
Work in solution on hard-to-reach areas (around fixtures and/or commodes) and walls etc. using Cleanfix Scrubby
3. Allow for 2 minutes dwell time and let the solution do its job
4. Rinse, remove soil and sanitize facility
  - a. Using the Cleanfix Firebird with hand tool briefly steam walls etc. and vacuum up soil
  - b. Using the Cleanfix Firebird with floor tool briefly steam floors etc. and vacuum up soil
