Congratulations on selecting a new TecVent from Dri-Eaz Products. It is our goal to offer you the best available products and tools for restorative drying. We invite your written appraisal and suggestions for improvements. Reading this information will help you achieve maximum benefit from this restoration tool.

THE TECVENT

The TecVent provides a method for ducting airflow through a window opening, while still being able to lock and secure the open window and prevent major air leaks.

A common use for the TecVent is to duct moist exhaust air – the reactivation air – from a desiccant dehumidifier like the DriTec 150 (shown) or DriTec 325. Place the TecVent on the inside edge of a window frame or sliding glass door, between the TecVent's two raised ribs, and close the window against the TecVent.

One or more lengths of pipe insulation, made of disposable plastic foam, are cut to size and fit onto the top of the TecVent to prevent air leakage through the window opening. When buying additional lengths of pipe insulation locally, specify 7/8" ID x 3/8" wall (fits 1/2" copper or 3/4" iron pipe).

When fit into sliding windows, the window opening gap will be two inches or less. For security reasons, prevent the window from being opened further. You can use the rail lock included with the unit (see drawing) on most aluminum sliding window rails. For additional security, or on vinyl sliders (the rail lock may damage vinyl) or older windows, cut dowel or similar material to size and insert into the window's slide channel, so the window cannot be opened from the outside. Some-

times a collapsing rods made for closets will also work.

Condensation in the ducting can occur when the ducting runs "uphill" to the outdoors. Follow instructions provided with the DriTec. Do not allow condensation to run into a DriTec dehumidifier. If necessary, punch a small hole, such as a nail hole, in the underside of the duct and let it drain into a container.

The TecVent is made for a 4-inch duct, which is standard for either DriTec dehumidifier or Mini-TurboVents. A 5-inch shoulder on the TecVent is useful for the 5-inch ducting from a Dri-X Airchanger.

WARRANTY

First 90 Days - Full Warranty: Dri-Eaz Products, Inc. promises to the original purchaser to repair or replace any part of a TecVent that proves to be defective in workmanship or materials for a period of ninety (90) days from the date of purchase. During the first ninety days, Dri-Eaz Products Inc. will cover all materials, labor costs and shipping costs to and from the service center.

After 90 Days - Parts Warranty: During the first year, Dri-Eaz Products, Inc. will provide all parts necessary to correct any part of a TecVent that proves to be defective in workmanship or materials free of charge. The customer is responsible for labor at the prevailing rate and for shipping costs to the service center.

After One Year: The customer is responsible for all repair charges including parts and labor, at the prevailing hourly rate and shipping costs to and from the service center.

This warranty shall not extend to any products showing effects of misuse, disassembly, alteration, lack of proper maintenance, corrosive chemicals, improper voltage, accident damage, unauthorized repairs, use of other than genuine parts and materials, fire, flood, normal wear or any other causes beyond Dri-Eaz Products' control.

Note: To receive warranty service, you must write in or call for a Return Authorization. No unit will be accepted without an authorization number, nor will any credit be given until the defective parts are received. The warranty obligation extends only to the repairs or replacement of parts found, upon Dri-Eaz Products' examination, to be defective.

The foregoing constitutes the entire warranty and no other warranty, liability, contingency or responsibility, direct, indirect, consequential or in any way connected with the sale or operation of equipment products is expressed or implied.

Note: Please direct questions on the warranty to an authorized distributor or Dri-Eaz Products, Inc. at (360) 757-7776.
