INSTITUTIONS AND  
HOMES*

## *CD35 DEHUMIDIFIER*

### **Applications:**

The Ebac CD35 is a go-anywhere portable dehumidifier. Rugged enough for industrial shops and storerooms, attractive enough to serve in a home den, basement or garage, yet reliable enough to withstand the abuse of the rental environment or water damage restoration jobs. It's self-contained and automatic.

### **Features:**

- 1) Ebac's "HOT GAS" defrosting feature which automatically melts away frost build-up providing effective operation at cool ambient temperatures, down to 33° F.
- 2) A built-in 6-quart capacity collection bucket with an automatic shut off and "Full" indicator lamp.
- 3) A convenient drain point for garden hose attachment.
- 4) Optional condensate pump.
- 5) An adjustable humidistat, to control the level of dryness desired.
- 6) A sturdy carry handle and rolling casters for ease in mobility.

### **Specifications:**

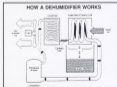

MODEL: CD35	Volts: 115
Horsepower: 1/3	Amps: 4
Refrigerant: R-134 A	Capacity: 6+ Gallons at Saturation
Fan: 1/50 HP	Height: 21", Width: 14", Depth: 14"
CFM: 170	Weight: 57 lbs.

### **Performance:**

The Ebac CD35 dehumidifier is a compact, stand-alone unit which provides quiet, maintenance-free service in extreme environments without the cost and irritation of coil freeze-up. This simple, yet effective solution to a damp basement or clammy locker room rolls easily to the problem area and goes silently to work.

### **Operation:**

The effective answer to excessive humidity is a refrigeration-type dehumidifier. Warm moist air is drawn by a fan across a cold coil which causes the water vapor to condense onto the coil and drop into a container or tray. The cold air is then passed over a heat exchanger where it is warmed before being passed back into the surrounding area. A dehumidifier that has a humidistat which automatically switches it on and off saves energy and expense by maintaining the desired level of humidity with intermittent operation.
