

A FULL RANGE OF
HIGH CAPACITY
LOW TEMPERATURE
DEHUMIDIFIERS
FOR INDUSTRY,
INSTITUTIONS,
RENTALS AND HOMES.

CS 60 DEHUMIDIFIER

Ebac manufactures World Class dehumidification equipment to provide the humidity control you require. Use the appropriate Ebac unit to:

- 1) Prevent condensation from forming on windows, walls and ceilings.
- 2) Stop mold and mildew.
- 3) Eliminate rust and corrosion.
- 4) Remove excess moisture.

Applications:

The Ebac CS60 Commercial/Industrial Dehumidifier was designed to provide energy efficient humidity control in a wide range of applications including offices, laboratories, apartments, storage areas, restaurants, bars, museums, locker rooms, computer and telecommunication rooms, basements, crawl spaces and drop ceilings. It is a quiet, high efficiency, high capacity unit designed to suit your HVAC needs.

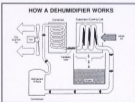

Features:

- 1) Rugged, epoxy powder-coated steel chassis and housing.
- 2) Hot gas Defrost feature which automatically eliminates frost build-up providing effective operation at low ambient temperatures.
- 3) Simplicity of installation and operation with standard 115V plug and extra long power cord.
- 4) Adjustable Humidistat for a fully automatic operation.
- 5) High Efficiency Rotary Compressor.
- 6) Rubber Anti-vibration Feet.
- 7) Collapsible Handles.

Model:	CS60	Amperage:	7 Amps (Maximum)
Compressor:	High Efficiency Rotor	Height:	13.25"
BTU/HR:	6625	Width:	13.75"
Refrigerant:	R-22	Depth:	20.25"
Airflow:	360 CFM	Weight:	63 lbs.
Power Supply:	115V/60Hz/1PH	Capacity:	56 ppd @ AHAM 15 Gallons at Saturation

Operation:

The effective answer to water removal is a refrigeration-type dehumidifier. Warm moist air is drawn by a fan across a cold coil which causes the water vapor to condense onto the coil and drop into a container or tray. The cold air is then passed over a heat exchanger where it is warmed before being passed back into the surrounding area. A dehumidifier that has a humidistat which automatically switches it on and off saves energy and expense by maintaining the desired level of humidity with intermittent operation.
