Model Number: BE-9000ER

BE Pressure BE-9000ER PowerEase 9000W Generator Electric Start 7100 watt run
BE9000ERUSC 420cc 777987147850 Freight Inc

Manufacturer: BE Pressure Supply

BE Pressure BE-9000ER PowerEase 9000 watt Generator Electric Start 7100 watt
run BE9000ERUSC

This generator will give you 50% more output power than the BE-6500ER.
It's a great way to start up a 110 volt compressor or run your carpet cleaning
equipment.

Product Number : BE-9000ER

Manufactured by: BE Pressure

Electric Start! Just flip the rocker switch!

Two year Warranty (free replacement parts for 2 full years)

All parts for engine in stock

59.17 amp Output @ 120V Running amps

15HP PowerEase gas engine / 420cc OHV Engine

7100W Continuous power

Includes 3 gang 120V 5-20R, one L5-30R twistlock and one L14-30R 240V
twistlock receptacles

Stainless steel control panel

Auto idle (save fuel, wear, and noise)

California Compliant carbon canister included and installed (\$100 value)

Key switch Electric start \$300 value

DC output of 12V and 8.3A

A reliable Electric Start Starting System

Fuel Tank Capacity of 25 Liters (6.6 gallons) and a max run time of 6.5 Hrs at full
load. Up to 10 Hours 1/2 load.

Noise level at 7m of 78db

225 lbs.

Owners Manual

Factory Brochure

Handle, wheel kit, AND battery INCLUDED (Value \$100)

Note battery will be dead on arrival and will have to be charged or replaced.

Factory does not warranty the battery

>

Some original box damage so unit might arrive with a replacement box. Unit is brand new.

Shipping Weight 216 lbs 28"X23"X23" Box

Ships in either black (default) or yellow paint job and we do not open the boxes to see what color your are going to receive.

Generator rules:

Always ground the generator to either to the ground pin of the home electrical outlet and /or with a metal ground stake.

Always use the power evenly. All generators have two power producing sides. This means that a 7200 watt generator is really two 3600 watt generators. Please do not pull all the power out of one side and not the other. You will notice that their are six standard 120 volt outlets on the generator. 4 receptacles are on one phase of the generator and 2 are on the other phase. If you are needing a fourth outlet, the best way to accomplish even electrical consumption is with the L14-30R connection to a distribution power adapter or use the L5-30R adapter. Do not run E85 fuel. Use

>

ethanol free or premium fuel. Use full synthetic oil and change oil every 100 hours. Please note for longest life use ALL generators at 50 to 65% their surge rating. This means for longest life please use this generator at 4500 - 5500 watts or less. When you are finished using the generator, turn the fuel ball valve off and let the carburetor run dry so the generator will turn itself off. Always use a fuel stabilizer.

Shipping is to a commercial location where there is a forklift or we can hold at the nearest trucking company terminal. Home Delivery surcharge \$80-120 more
