86973760

Optional 20-0142 brush lip for \$32.00 more (unit comes standard with Nylon lip).
When you purchase this option you will have two, both the nylon and the brush lip.
Brush lip is used for floors that do not have a deep grout lines. This is true with marble as an example. The solid lip must be removed to be able to install the optional brush lip.

Please note we ran a test with hooking this wand to different vacuum hose cuffs.
Please note the following cuffs work: AH46, AH44, the standard 1-1/2" treaded by slip does work but not very well. If you want to use with 1-1/2" ID vacuum hose, please purchase an AH46
