Manufacturer: Husqvarna Equipment

Husqvarna 547082801 A25 Inlet Adapter
Number 6 in Image

The A25 is part of our latest generation of air cleaners, developed with a whole new level of intelligence and mobility to meet customer demands. Recommended for spaces up to 25 m²; in a single-use set up. A colour-coded visual alarm clearly indicates the filter status. The innovative units are compact and stackable – an advantage when it comes to maintenance, transportation and handling. The A25 can be used as both an air cleaner and a negative air machine. Two- or three-stage filtering captures various particles commonly produced on a construction site, including silica dust and wood dust, as well as dust from metal, gypsum and other materials. The active carbon filter is available as an option. Preloaded with one HEPA and 1 prefilter

Power source Corded

Phases 1 ph

Rated input power 0.4 hp

Air flow 353 cfm

Optional

Husqvarna 547676701 15 Pack CASE A25 Replacement Pre-filters
