Installation Reminder

Inspect plungers, brass seal retainers, valves, and pump oil condition while the pump head is open. New seals can fail early if installed over scratched plungers, scale buildup, damaged retainers, or a pump that has been run dry or overheated.

Important Ordering Note

Pressure washer pump parts can look similar but vary by plunger diameter and pump generation. Please match the part number 8.753-821.0 or 87538210 before ordering.

If your pump uses an older seal design, additional parts may be required.
