RHG T-Euro-Tip-Plastic Tucker Euro Tip to Convert Water Fed Pole for Quick Release - Plastic

Manufacturer: RHG Reach Higher Ground

Tucker Euro Tip to Convert Water Fed Pole for Quick Release - Plastic

Description

The all new Tucker® euro tip is designed to fit into the top of the new Tucker® T1 clamp on all Tucker® carbon fiber water fed poles. Lightweight and strong, these are a great way to create a quick release option at the tip of the poles for removing and storing brushes and changing out the various Tucker® water fed pole brushes.

There is a hole through the tip to allow for the feeding of your water fed pole tubing up the tip and into your brushes.

Also available is an ACME version that will turn any Tucker® carbon fiber water fed pole into a trad pole.

You can find the ACME tip here: [ACME tip for converting to a trad pole](#)
