Model Number: 20260327

Clean Storm 20260326 8-3 X 100 Foot Extension Cord For Direct Wire of Single Phase Concrete Grinders

Manufacturer: Clean Storm

Clean Storm 20260326 8-3 X 100 Foot Extension Cord For Direct Wire of Single Phase Concrete Grinders

• **Heavy-Duty & Durable & Flexible**—Our Heavy Duty 8/3 SOOW Bulk Cable (Service, Oil, and Water Resistant) (3 Conductor) is a special type of electric wire which is widely used in industrial, commercial, and outdoor applications. The insulation properties and robust PVC jacket enable it to withstand oils, acids, water, and chemicals, as well as stable use in harsh environments.

• **OFC Wire Material**—8 Gauge 3-Conductor OFC (Oxygen Free Copper) wire is made from stranded pure copper conductors, which can provide increased conductivity to carry more current and has much higher corrosion resistance and improved heat absorption over non-OFC wire, ensuring reliable performance in harsh environments.

• **Versatile Applications**—It is commonly used in industrial settings, as well as outdoor and marine environments. The wire's insulation properties and robust PVC jacket make it suitable for use in environments like this, including generation, mining, oil and gas exploration, and marine environments, and more. It also can be used for power and control circuits, portable tools and equipment, portable lighting, and portable appliances.

• **Common Uses for 8 AWG SOOW Cable**—Distributing power in industrial settings, providing power for portable power and lighting at construction sites, events, and for emergency services, powering outdoor equipment like pumps, lighting systems and generators, supplying temporary power needs for events and shows, connecting heavy-duty electrical equipment such as motors and transformers, and serving for marine applications by linking electrical systems on ships and boats.

• **What's in the Package—NO Ground Wire**—One 16.6mm diameter SOOW cable cord wire, 8AWG - 3 Conductor, 100 feet in length
