Manufacturer: Malish

Malish 52020, Mastic Demon Prep Tool 20 inch, Polish Prep, Stone and Concrete Maintenance, GTIN 6-15129-52020-1

Description

Prep Tool is the next-generation solution that completes The Mastic Demon Concrete & Terrazzo Restoration and Polishing System. Its patent pending design features independent floating heads paired with specially formulated diamond cup wheels to create a uniform profile, perfect for preparing concrete and terrazzo floors for polishing. This chemical-free solution uses only water, ensuring safe and effective results.

Concrete Applications: Transition smoothly from Mastic Demon®; coating removal to a superior polished finish. The patent pending independent floating heads keep the Diamond Cup Wheels in constant contact with the concrete, reducing the deep scratches created by Mastic Demon®, and perfectly prepping concrete for polish. Achieve a high shine and superior image gloss with the Diamond Devil®; 3+1 polishing system, without the use of coatings.

Terrazzo Chemical-Free Stripping Applications: Strip up to 5 coats of floor finish, 2 coats of floor sealer, or 1 coat of urethane—chemical-free, using only water—to prep terrazzo floors for polishing. Achieve a high shine and superior image gloss with the Diamond Devil®; 3+1 polishing system, without the use of wax, floor finish, sealer, or urethane.

Warning: To prevent damage to cementitious terrazzo, monitor the slurry for color changes. If the slurry becomes dark or non-transparent, you've reached the floor and need to stop.

*Prep Tool performs best when used with Malish Diamond Cup Wheels.
