Heavy Residential Use – Light/Medium Commercial
Vapor Clean and our Pro6 have stepped above and beyond the standards of design and performance with this great steam machine! We have perfected our Pro6 to give you the most for your investment. The functional design stands far above it’s comparables in the market place yet continues to offer unbeatable value.
Our Vapor Clean Pro6 offers the convenience of the continuous reservoir system up to 315° heat – optimum operating specifications with that “one” big convenience of non-stop steam vapor cleaning!

Tackle lengthy tasks without stopping for refill and reheat – eliminate “down time”
Convenience, Durability and Exceptional Quality – Yet, the most affordable heavy duty Continuous Fill on the market.

The Pro6 is constructed of materials chosen only to improve the quality, not cut corners and cost of materials. The commercial stainless steel exterior and stainless 18/10 AISI 304 quality boiler speaks for itself. The Pro6 offers such features as an industrial grade detachable hose which allows easier storage and comfort in knowing that your machine is perfectly safe to pull along as you clean. This design is far more solid and durable than other outdated designs with attached hoses. Other features include a pressure regulator knob allowing you to adjust the amount of steam/pressure output for your specific cleaning task. The numbered pressure gauge will give you an exact indication at all times to optimize your cleaning.

Our full service warranty includes 1 year defective Parts & Labor and lifetime boiler and heating element replacement. All service is provided by Vapor Clean.

Vapor Clean Pro6 Duo Steam Cleaner Freight Included

Gary Hughes, Yantis TX posted:

As a former “Lady Bug” owner and steam clean advocate. Let me tell you how pleased I am with the Pro6. Right out of the box I could tell
that the attachments are heavier duty. Being familiar with steam cleaning it took me just seconds to get started. I filled the machine
plugged it in and turned it on. I was really surprised when the ready light came on so quickly. I really thought I had misread the ready
light. I would still be waiting for the Lady Bug to heat up. Not believing it was ready, I flipped the switch on the handle and
volumes of steam came out! The Pro6 definitely produces more steam than the Lady Bug. While cleaning I noticed the hand grip was more
comfortable and the steam switch was a true on/off switch not requiring constant pressure like on the Lady Bug. The caster were
smoother on the Pro6 gliding from tile to carpet with less effort The longer hose and electrical cord made it even better. I was able to
clean my kitchen and adjoining hallway without moving to another outlet. I was so busy cleaning that I didn’t realize I had gone past
my normal cleaning area set by the cord length of the Lady Bug.
You may be wondering why I bought another steam cleaner? Currently my Lady Bug is not working. And the problem is a simply one that has not been corrected by the manufacture. The electronic circuit board keeps if not properly tighten can condense on the circuitry. It’s not a hazard or anything like that but it does cost 142.00 plus shipping
(one-way) and down time to have it fixed. I know I have had 3 of them replaced. You figure 3 boards and shipping it is not that far off
from the price of the Pro6. I hated to scrap the Lady Bug but I knew until the manufacture coated the circuit board with a waterproofing
It would be a constant problem and expense. When I called your company the first thing I asked was if the circuit board was
protected from steam. If it were not, I would had gone to another manufacture. The nice lady on the phone said it was coated so I
placed my order. I figured that if they, the engineers of the Pro6 knew enough to waterproof the circuit-board than they had probably
thought-out many other features of the machine. Many of the most important things are on the inside that the consumer will never see.
Thats what makes a great machine. It’s very obvious to me that the Pro6 is far superior to the Lady Bug. One more example… The hose
connector on the Lady Bug is capable of leaking steam that could damage or short the electrical connections where the hose plugs into

Vapor Clean Pro6 Duo Steam Cleaner Freight Included

the machine. In the Pro6 the steam and electrical connections are compartmentalized eliminating this possible failure point.

I could go on and on… But in a nut shell the Pro6 is twice the machine of a Lady Bug and half the cost. Now I know I have been slamming the Lady Bug pretty hard but on the positive side it was a steam cleaner, and that is the best way to clean. My first steam cleaner was a $200 a clean-n-wait-n-fill-n-wait etc… So from my humble beginnings till today I feel like I have reached to top! One more… There is a place on the Pro6 to roll the lengthy electrical cord! Thank you! Thank You!

Gary Hughes <real person not a salesperson for any company that sells steam cleaners / ex Lady Bug owner!

This is just another testimonial to the Pro6. I love it. Again, I had to clean a filthy bathroom, kitchen floor, neglected stove. It just makes the work so much easier. All I have to do is use a large sponge to mop up. Awesome! Someday I will send you pictures:) This machine amazes me! I still own the Saeco Supervapore 4500, not a bad machine, but pale in comparison to how fast dirt, rust, stains, mold, are blown away by the Pro6. God! This machine was meant for an older “hermit” like me, that doesn’t clean like I should! The fact the the brushes are available for a cheap price really make it a worthy investment. (I couldn’t even get a reply from Saeco on refurnishing the brushes, as we know they are the forefront of these great steam machines.)

Tim S. Denver, Co posted:

Here’s my feedback on the Pro6 steam cleaner that I purchased a few months ago.

* Good sturdy unit
* Intuitive to setup and get running
* Puts out good steam
* Attachments work well together and connect together smartly
* Brushes have a clever design which allows user to attach any type of rag for cleaning
* Warranty the best in the business for this type of model
* I like how the product is designed but it is made in Italy. However, I am very glad it did not come from China (I have issues with how their workers are paid and treated).
* Unit is used weekly for about 4 hours to clean kitchen, bathroom, basement stairs and anything that has a safe surface. It will remove the finish from a no wax floor but mine was shot to begin within.
* One of the unique uses I am using it for cleaning is I have an oriental area run that had got wood stain spilled all over it. Though its a lengthy process, the steamer is heating the petroleum based stain and allowing it to be removed without ruining an otherwise good rug. It hasn’t taken all of the stain but it is removing the chemical smell.
* I’ve noticed that cleaning times are becoming less and less probably because there is no sticky residue left by cleaning products. Most of my cleaners have been located to the basement as I no longer use the ammonias, bleaches, etc.
* I would recommend the unit. The pre sales support was good and I felt upfront and honest. I am sick and tired of unscrupulous people. Kathy I think was her name gave me the low down and her opinions and I bought a unit. I haven’t been displeased in any way. Hey Walmart and Home Depot are you listening? So, in a nutshell the machine has:
* Met expectations and delivered as I expected
* Customer service (pre-sales) on the level
* Satisfaction, excellent

Thrilled to bits with my new Pro6!

I’m sorry it’s taken me so long to write guys, but I wanted to give my new Pro6 a good ‘workout’ so I could let you know how I like it. As you know, I had been using vapor cleaners for many years to clean my home back in England, and the Pro6 is the second vapor cleaner I have bought since my move to the USA. The first vapor cleaner was a commercial quality cleaner, which worked OK, but was very heavy and bulky and did not have a continuous fill feature- this is the reason that I decided to buy myself a newer model, and chose

the Pro6 with your help.

I am thrilled with it! It is so much easier to move around than my old

model, and it actually cleans better! We have 2 messy kids and 2 Great Danes (with muddy paws). Combine that with very pale grey carpets and you can imagine the problem I have keeping my carpets clean. I used to shampoo the family room carpet at least once a week – but that meant keeping the dogs out all day, and the family off the carpet, until it had dried. The carpet looked clean for the first couple of days, but then brown stains would re-appear wherever it had gotten the most wet during shampooing. I am

now using the Pro6 to clean the carpets, and it is doing a great job – plus there are no more brown stains and the dogs/family can tread on the carpet straight after I’ve cleaned. My old vapor cleaner was useless for carpets, it kept losing pressure and just didn’t ‘clean’ them – but the Pro6 does the job great! I ‘pre-blast’ any really grubby bits/stains with the nozzle first, and only occasionally have to use a spray cleaner. The Pro6 is even getting out the paint/glue/goodness-knows-what that my 9-year old has

managed to spread over her bedroom carpet! There is also the added comfort that my carpets have been sanitized too. I am also using it for the bathrooms, kitchen, oven, walls, hardwood floors, windows, mirrors, light fittings…..anything and everything!

I am so glad I went for a continous fill machine – the cap just lifts off

(no wrist-breaking trying to get the safety cap unscrewed, like on my old machine), and the opening is nice and wide, so it’s much easier to pour water in without spilling it. I can add water whenever I want without having to wait until the steam runs out – a big bonus, because I can clean downstairs, then refill before I go upstairs to clean. The Pro6 holds pressure MUCH better than my old machine, and heats up a lot quicker too (ready to go in about 5 minutes, from cold, compared to 15 minutes with my old one – and once it’s initially heated up, it’s

Vapor Clean Pro6 Duo Steam Cleaner Freight Included

ready to use instantly whenever you refill). The clips to attach towels are easier to use than on my old machine too – I was previously having to mess around with baggie clips and clothes pegs to try and get the towels to stay on my old vapor cleaner.

So – as an ‘experienced’ vapor cleaner user – I can heartily recommend the Pro6!

The Vapor Clean TR6 once again has stepped above and beyond the standards of design and performance. We have perfected the design to give you the most for your investment. The functional design stands above it's comparables in the market place and still offers unbeatable value.

Our Vapor Clean TR6 offers the convenience of the continuous reservoir system - all of the same accessories, stainless boiler, optimum operating specifications with that "one" big convenience of non-stop dry steam cleaning!

In maintaining our commitment to excellence our service and warranty department is

Steambrite Supply

Vapor Clean Pro6 Duo Steam Cleaner Freight Included

led by our "on staff" Electrical Engineer, BSEE, IEEE.
Our Vapor Clean™ TR6 has evolved into an extremely functional, reliable and highly rated machine by our customers. Our TR6 has a one quart boiler to make it the most functional reservoir system on the market. The smaller sized boiler allows for faster heat up, and quick recovery and maintenance of temperature and pressure in the boiler. The reservoir holds two quarts of water for long time running before adding additional water into the reservoir. The TR6 does have an audible low water beeper as some in this same category do not.
Our TR6 is a convenience and a luxury for the homeowner, but a necessity for the business owner. Please call us with questions so that we may guide you if you are uncertain of your needs.
The TR6 is constructed of materials chosen only to improve the quality, not cut corners and cost of materials. The stainless steel exterior and stainless 18/10 AISI 304 quality boiler speaks for itself. The boiler matches machines that retail for over $1,000. The TR5 offers such features as an industrial grade detachable hose which allows easier storage and comfort in knowing that your machine is perfectly safe to pull along as you clean. This design is far more solid and durable than other outdated designs with attached hoses. Other features include a pressure regulator knob allowing you to adjust the amount of steam/pressure output for your specific cleaning task. The numbered pressure gauge will give you an exact indication at all times of the performance of your machine to optimize your cleaning. The temperature and pressure is stated as per manufacturers specifications of up to 4.5 bar (65+ psi) and 298 F. boiler temperature.
Our full service warranty includes 1 year Parts & Labor and lifetime boiler and heating element replacement. All service is provided by Vapor Clean.

When operating the machine, it is simple and easy to use. The TR 6 will heat up normally in 6 minutes (fastest in the industry) with regular tap or distilled water. When heated, there is a separate button on the machine to push when ready to clean. The machine emits very little dripping as some more expensive models can, due to the design. The recovery of pressure in the boiler is quick due to 1700 watts and a functionally sized boiler. Continuous Fill models performance will be far more consistent and less time consuming. than larger 3 & 4 liter boilers that lack efficiency.

The accessories all come standard as shown in the photos. The accessories included with this machine are the same accessories that come with "commercial" machines priced in the $1,000's. The durability and design of these accessories are exceptional. With the exception of course of the "detail" cleaning brushes, which we replace even on the most expensive of machines as these are universal and do wear eventually. Fairly, our detail brushes retail for 3.50 each compared to that of some retailers selling these upwards of $15 to $20 each, yet in fact are a longer bristled than most..

Warranty and Return Policy

We feel it extremely important for not only the consumer to understand his/her rights and responsibilities after your purchase, but to also understand our obligations and responsibilities to you as a retailer. We encourage you to check all companies policies before making purchases to reduce possible misunderstandings after your purchase.

Product Warranty Information

The factory warrants to the original purchaser that this product, excluding accessories, shall be free from defects in manufacturing and material, under normal and reasonable use for a period of one year from date of purchase.

For this warranty to apply, the owner and/or user must follow the instructions provided herein, with the product. The proof of purchase must be submitted with return of the product for warranty to apply. The product returned to the manufacturer/Vapor Clean Products Inc. is to be shipped prepaid (see exceptions) in a protective carton. The manufacturer advises the purchaser to insure the shipment against possible loss or damage in transit. The manufacturer will not be responsible for items lost or damaged in transit. Purchaser must contact retailer prior to shipping product for repair to receive proper instructions and authorization.

This Warranty is Void if: product is damaged due directly or indirectly to misuse, abuse, negligence, accidentals, repairs or alterations outside our facilities, lack of maintenance, or used not in accordance in the owners manual. The sole and exclusive remedy under this warranty is repair or replacement, at the Manufacturer's option, of any product that proves to be defective in manufacture or materials within above stated period. This warranty is not transferable.

This Warranty is void if residential/home equipment is used in commercial use.

This Warranty is Void if: Product has been operated with substances other than city water, non softened water*, bottled or distilled water. Any substance introduced into the boiler other than acceptable stated waters will void warranty.

The manufacturer or it's representatives is not liable for any consequential or incidental damages (including personal injury, property damage or monetary loss) that may be incurred from purchase, use, or inability/improper use of the product. Maximum liability shall not exceed the purchase price of the product paid by the original purchaser.

Some states do not allow the exclusion or limitation of incidental or consequential damages.

Lifetime boiler warranty, part only, applies on purchases made after 10/01/05. Prior to this date of 10/01/05 a 5 year boiler warranty, part only, applies.

Effective 5/23/08 Heating Elements are included with the lifetime boiler warranty.

Ground shipping will be paid on qualified warranty repairs effective 5/23/08 to the 48 continental US states.

The extended warranty only applies to retail purchases.

Equipment: Hard Surface Cleaning Supplies > Vapor Steamers > Vapor Clean Pro6 Duo Steam Cleaner Freight Included

Vapor Clean Pro6 Duo Steam Cleaner Freight Included

Ebay purchases or any item not purchased at full retail price unless otherwise noted, receive the 1 year parts and labor mfg. warranty as described above.
Shipping will be paid within 30 days of purchase for damaged or defective products.

This machine is a Continuous Fill machine.
It cannot be used with Distilled Water.
You must use tap water only with this machine.

Free Shipping/Delivery
Vapor Cleaners listed on are offered with free shipping. This only applies to items shipped to addresses within the Continental United States. Any consumer purchasing outside the Continental US (Hawaii, Puerto Rico, Canada etc.) waives Free Shipping. All shipping charges normally paid by the retailer for possible warranty repairs shall be waived.
Damage in Shipping
Products arriving with damage in shipping, must be reported to the shipper (retailer) within 3 days of receipt to file appropriate claims with the transporter.

All debts incurred by services rendered by implied contract or product purchases by agreement to the terms and policies put forth by Vapor Clean Products Inc., at the directors discretion may be turned over to a third party agency for collection. Additional fees will be applied fpr processing such claims.
