Description Cross Reference  
Nozzle #2 x 5, 1/8" MEG, 0502 stainless steel

Before Ordering

Please confirm your old nozzle is marked 0502 and uses a 1/8" male pipe thread. Spray angle, orifice size, and thread size must match your tool for proper cleaning performance.

Why Replace This Nozzle?

Worn nozzles can reduce cleaning pressure, change spray pattern, cause uneven cleaning, or make rotary tools spin improperly. Replacing worn stainless steel jets helps restore proper spray impact and cleaning performance
