Robotic Designs Anatroller ARI100 Robotic Air Duct Cleaner ARI-100

Manufacturer: Robotic Design

Robotic Designs Anatroller ARI100 Robotic Air Duct Cleaner
Included Free with this purchase

.Clean Storm: Electric ULV Cold Fogger For AirDucts

Sporicidin Disinfectant - 1 Gallon

The ARI-100® of ANATROLLER® is a specialized robot dedicated to duct cleaning and inspection. It includes our articulated arm that can move in all directions allowing it to clean all corners of the duct without ever having to manually adjust the length of the brush, leaving a quality job behind it every time. It is designed with Robotics Design's patented ANAT® modular shape-shifting technology, and is light-weight, durable, resilient, adaptable and easy to control. It is Robotics Design's most powerful robot for brushing, and with its ability to clean 150 feet/hour our clients have reported a full return of investment within only six months of purchase. The ARI-100's unique abilities render it the most efficient robot for HVAC cleaning and inspection on the world market. We also offer customized designs and add-ons for special applications and to better fulfill your individual needs.

Advantages

- Connected by only 1 cable combining air intake and robot control
- Anti-tilting robot
- Symmetric, robust, modular design
- Compact and light-weight robot weighing only 6 Kg
- Custom-designed robot
- Remotely shape-shifting capability
- Climbing obstacles of 5' in height
- Going on slopes of 45°
- Zero radius turn ability
- High quality precision machined
- Operating in severe industrial environment
- Water resistance (optional)

>

- Friendly-user control unit
- Carrying and towing payloads capability
- Manipulator arm (optional)
- Easy maintenance

Included With the ARI-100

- Large wheels or tracks 8.5" inches
- Camera #1 integrated within the robot
- 100' feet of Cable
- Carrying case for storing the robot.
- Video Output
- Security Key
- CW-1403 : 1/4 inch with 3 whips
- CW 1401 1/4 inch with 3 whips
- CWF 1401 forward blowing 1/4 inch with 3 whips
- CB 014AF forward aluminum
- GP-350 800 RPM Pneumatic motor
- ADA 006 bristle adapter for the motor
