Model Number: 29.115

Mosmatic 29.115 Car Wash Wand Holder with Recovery Port floor mounted 29inches 2.4inches

Manufacturer: Mosmatic Pressure Washing Equip

Mosmatic 29.115 Car Wash Wand Holder with stop feature, floor mounted 29" X 2.4"

Wash-Bay equipment

Mosmatic offers numerous wand holder and brush bucket, which are made entirely of polished stainless steel. Their heavy-duty construction, top-quality finishing and intelligent design will add value to more than just the appearance of your wash bay.

Floor/wall mounting

These products are available for wall and floor mounting. Brush buckets are designed to work for both mounting options.

Suspension

In case of high pressure, the integrated suspension will yield. This prevents the entire weight from being transferred to the wand holder.

Wand stop

The wand stop is activated when the wand is operated without the high-pressure spray gun. This prevents the wand from accidentally being ejected from the holder as the pressure builds.

Overflow/outlet port

A brush bucket that is equipped with an overflow port allows excess water to drain out of the overflow port. The brush bucket with an outlet port will not hold water so any excess water drains out immediately.

Polished stainless steel (inox)

A strong and visually elegant design are a priority for all Mosmatic products. We use polished stainless steel (INOX) for all our products protecting them from rust and extreme weather conditions.

Ready to install

All Mosmatic products are delivered pre-assembled. You can install the products yourself by following the enclosed instructions. The product is ready for immediate use after being connected to the media supply.
