Big D BGD 202, Fire One Shot, After Fire Odor Control Fogger, Case

Manufacturer: Big D

Back Ordered

Fire D One Shot Fogger

Description

Once a fire has been put out and the mess has been cleaned up, finish the job by using FIRE D®. Because smoke coming from an intense fire is under pressure, it's forced deep into cracks and crevices, into and through porous materials. Smoke particles have an odor that haunts building owners long after clean-up, particularly when humidity is high. FIRE D® will kill the odor, like it was never there.

Use FIRE D® ONE SHOT AEROSOL FOGGER to kill after-fire odors in automobiles and other small enclosed areas where a fogging machine would be awkward or electrical power is not available. FIRE D® may also be used to kill such overpowering odors as decomposing bodies and flood residue. One 5 oz. can provides up to 10,000 cu. ft. of odor-destroying coverage.
