Shazaam 20170115, Chemical Start Up Package, for Stains and Spotting, Starter Kit

Manufacturer: Steambrite MFG

Shazaam 20170115: Chemical Start Up Package for Stains and Spotting Starter Kit Description

We have compiled the list of the best stain removers for carpet cleaning.

These will remove the most common stains that regular cleaning cannot remove. One each in this set.

Adding heat will accelerate process and takes the place of dwell time but be careful. Sometimes it is better to heat the spot up first by making the carpet hot. Then add the spotting agent, agitate and rinse. I do not recommend you use any of these products for free.

Features

- Red Relief is not compatible with any other dried or mixed chemicals. Please preclean and rinse carpet before you attempt to use this product!
- Please note it is NOT OK to mix Red Relief with Just Like Magic. These are chemical opposites and will damage carpet if you do. If you have an un-known spot and think you are going to have to try both to remove, always use the Just Like Magic first and aggressively rinse and blot dry before you switch to Red Relief.
- Please wear gloves, safety glasses, and ventilate your service area.
- For ink removal do not preclean the carpet. Use ink remover, agitate, add mixed Just Like Magic on top, re-agitate and rinse. The ink will disappear!
- For Gelzolv and POGO it is important that the carpet be HOT. Apply steam bi-directionally on the carpet with the vacuum, apply, agitate, and rinse. Please note this is a NVDS spotter and to remove this spotter you will need to re-clean this spot with cleaner and re-rinse. NVDS spotters leave an invisible dirt attracting residue behind so you do not re-clean (not just rinse) it will cause a reoccurring spot.
- As far as Deep Green this weird looking stuff just works. For all the weird spots you do not know what to do with. Heat up the carpet with bi-directional steam and vacuum, apply, agitate, rinse. If the stain does not come out you can attempt a second try and add a damp white unprinted cotton cloth on top with gentle clothing iron steam for a few seconds. Please note do not over do this option or you will pull carpet color!
- These stain removers for for synthetic fabrics only. Do not use on wool, silk, jute, cotton, and rayon.
- Do not perform these procedures without a release form signed and extra money for using them! These stain removers work and will remove stains that would not come out with regular aggressive carpet cleaning.
- Please do not leave any of these products in the carpet to dry on their own except for Just Like Magic and Yellow Out and even with this chemical rinse when you can.
- Do not rub into the carpet with your fingers or touch them!
- Read and follow all labels.
- Includes one each of the items below

Includes

>
