Model Number: MI20

Injectidry MI20 Wall and Ceiling Package 55700

Manufacturer: Injectidry System

Injectidry Wall and Ceiling Package MI20 / 55700 / 86323

The Ultimate Drying System # 55700

Injectidry's High Pressure drying systems are specifically developed to target high risk areas of hidden moisture such as: walls and ceilings, even those coated with watertight finishes like PVA paint and vinyl wallpaper coverings, double-sheeted fire walls, party walls, sound barriers, insulation, walls behind cabinets and fixtures and floors. The Injectidry ®HP drying system is the only truly "industrial grade" system sold today. The internal blower is a Regenerative Blower and many operate 20,000 hours or more trouble free. This translates into more than 10 years of continuous operation. It is not a fan that is typically associated with a portable carpet cleaning machine or shop-vac.

The HP60i comes with:
