Thornell 740379511126 Odoricide 210 Concentrate Serious Odor Problems 16 oz 210-P

Manufacturer: Thornell Corp

Thornell 740379511126 Odoricide 210 Concentrate Serious Odor Problems 16 oz 210-P

Description

Odoricide 210 is a safe, economical and most importantly effective deodorizing product. Odoricide is a complex blend of safe, biodegradable ingredients that work through several actions. Those actions include chemical bonding, physical absorption and counteraction. These actions lead to one result, the complete elimination of odors. Odoricide also contains inhibitors that will control odors caused by further organic decomposition and residuals that continue to combat odors long after application. It works fast with no dwell time (unlike enzymes) and is no danger to pets, people, or wool carpets. Works well on carpet, canvas, clothing, floors, walls, as well as toilet holding tanks.

Features

It Works

- Permanently eliminates, NOT masks, malodors.
- Immediate results. No dwell time.
- Covers the complete range of odors caused by animal, human urine; feces, vomit, male cat spray, decaying organic matter, mold and mildew.

Different Technology

- Bonding (chemisorption), counteraction, absorption.
- No problematic enzymes, bacteria,
- oxidizers, olfactory desensitizers.
- Inhibitors and residuals which prevent new odors from old and new deposits.

Safe

- Nontoxic, Nonirritating and Nonflammable
- Can be used on wool (does not break down wool fibers)
- Nonstaining, Nonionic and Noncarcinogenic
- Biodegradable, Water Based, (6.8 pH when diluted)
- Noncorrosive

Economical

- Indefinite shelf life in all forms.
- Concentrates are extremely economical.
- Compatible -
- With germicides, unlike any enzyme bacteria based products.
- Works with all detergents (INCLUDING RELEASIT).

Specification

Appearance: Water-white Liquid

>

Odor: Pleasant
pH: 5.75
Specific Gravity: .9973
Flash Point: 117°F

Ingredients

Odorcide 210 is a complex blend of safe, biodegradable ingredients that fall within the following:

- monohydric and oxidized hydroxyl-containing organic compounds.
- condensation products or organic salts and hydroxy-containing organic compounds.
- natural plant oils
- deionized water

Directions

Precautions

Effectiveness decreased when using with Chlorine solutions.

Always spot test for color fastness

One-time odor elimination:

For carpet, locate the source of the odor (a black light or moisture probe may help identify urine deposits) and treat after vacuuming loose dirt and debris. Mix concentrate with water at a rate of 1:16 (8 oz per gallon) and saturate 50% beyond the actual "spot" area. For general carpet deodorizing, add Odorcide® directly to the cleaning extraction system ensuring it penetrates to the odor source. Increase penetration by using a roller, hand manipulation, or by "walking" the product in.

On-going odor elimination:

Dilute with water or cleaning solution at a rate of $\frac{1}{2}$ oz per gallon. Apply to common areas with mop, sponge, or trigger sprayer. Use higher dilution for more severe odor situations.

Dilution

For serious, deeply imbedded odors dilute 8oz per gallon of water (1:16)

For milder odors dilute 2-4 oz per gallon of water (1:32-64)

For topical or general ongoing deodorization dilute 1/2oz per gallon of water (1:256)

For organic decomposition dilute 8oz per gallon of water (1:16)

Safety Cautions

Keep out of reach of children

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material safety data sheet. (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Frequently Asked Questions about Odorcide 210

Question: Does Odorcide 210 actually work?

Answer: Absolutely. But don't take our word for it, click on the "Free Sample" tab above and try it for yourself.

>

Question: Is it an enzyme?

Answer: No. Odorcide is not an enzyme. Odorcide uses a chemistry called Zwaardemaker Conjugates. This process bonds, absorbs and then counteracts the odor molecules ability to emit a vapor. The result is complete elimination of the odor.

Question: Does it work on cat urine?

Answer: Yes. Odorcide will eliminate the odors caused by pet urine. Simply identify the source and make sure Odorcide is used in a manner that will ensure contact with the odor molecule.

Question: Can you use it on oriental or wool rugs?

Answer: Yes. Odorcide is safe for use on rugs and carpets of all kinds. Rugs need to be treated front and back. A dip tank is best if available.

Question: Does it leave a residue?

Answer: No. Odorcide is a water based product thus no residue is left behind.

Question: Does it attract dirt?

Answer: No. Odorcide is non-ionic with a neutral Ph thus it does not attract dirt or debris after use.

Question: Will it hurt the finish on my floor?

Answer: No. Odorcide is a water based product and contains no caustic ingredients that will damage the floor surface

Question: Do I need to extract it?

Answer: Once Odorcide is applied its best to leave it until you are certain it has penetrated deeply enough to come in contact with the odor source. As many of the problems areas are on wood or concrete flooring, this process may take a few minutes. Odorcide needs to penetrate both of these hard surfaces to adequately reach the odor molecule. Once you are certain the penetration process is complete, you can extract the excess or you can simply let it air dry. If you are cleaning in addition to deodorizing, you can remove the excess during your cleaning procedures.

Question: What's in it?

Answer: The actual formula is proprietary but in general terms Odorcide is made up of a blend of natural ingredients that are safe for use on any surface to include leather chairs and hard wood floors. It is always recommended that you spot test before applications and as with all chemicals please keep them out of children's reach.
