Model Number: AHS06

Hydrotek AHS06 Dolly Only for auto pump out system

Manufacturer: Hydrotek

Hydrotek AHS06 Stainless Steel Dolly Only for Auto Pump-Out System

Part Number: AHS06

The Hydrotek AHS06 is a replacement stainless steel two-wheel dolly frame used on the Hydrotek RPV30E1 water evacuation / auto pump-out unit. This listing is for the dolly only and does not include the vacuum, pump-out system, tank, hoses, or electrical components.

Key Features

- Brand new stainless steel dolly frame
- Designed for Hydrotek RPV30E1 water evacuation / pump-out equipment
- Large pneumatic-style wheels for easier transport
- Corrosion-resistant construction for wet restoration environments
- Useful as a replacement frame, rebuild part, or custom equipment cart base

What You Get

- One Hydrotek AHS06 two-wheel dolly frame
- Wheel assembly as shown
- Hardware packet as shown when supplied by factory

Important Notes

- This page is for the 2-wheel dolly only.
- Does not include the Hydrotek RPV30E1 water evacuation machine.
- Photos are for reference only. Always order by part number AHS06.
- Specifications and appearance are subject to change without notice.

Common Uses

- Replacement dolly for Hydrotek RPV30E1 units
- Flood restoration pump-out equipment transport
- Custom stainless steel cart projects
- Wet-area equipment mobility

This stainless steel dolly is a practical replacement part for users who already own the Hydrotek RPV30E1 system and need the transport frame only. The current Steambrite page lists this item as AHS06 and notes it is the dolly only for the auto pump-out system. [:contentReference\[oaicite:0\]{index=0}](#)

**NEW APPLICATION UPDATE:** This listing has been converted into a universal heavy duty 55 gallon drum dolly page. Former Hydro Tek water evacuation equipment referenced on older versions of this webpage has been discontinued by the factory. [Move Heavy 55 Gallon Drums Safely and Easily](#)

This heavy duty steel drum dolly is designed to transport standard 55 gallon drums around warehouses, pressure washing trailers, janitorial supply rooms, restoration

>

jobsites, industrial facilities, automotive shops, and manufacturing plants.  
Perfect for moving:

- Chemicals
- Detergents
- Waste oil containers
- Pressure washing soaps
- Water storage drums
- Degreasers
- Liquid concentrates
- Bulk cleaning solutions

#### Features

- Heavy duty steel construction
- Designed for standard 55 gallon drums
- Easy roll mobility for commercial applications
- Helps reduce lifting injuries and operator fatigue
- Ideal for warehouses, garages, and industrial cleaning operations
- Low profile design for improved drum stability
- Commercial duty wheel and caster system
- Suitable for wet or dry environments

#### Common Applications

- Pressure washing contractors
- Janitorial chemical storage
- Car wash operations
- Industrial maintenance
- Flood restoration contractors
- Manufacturing plants
- Farm and ranch chemical handling
- Automotive repair facilities
- Warehouse liquid storage transport

#### Why Use a Drum Dolly?

Standard 55 gallon drums can weigh over 450 pounds when filled. A commercial drum dolly helps improve workplace safety while speeding up transport of heavy liquid containers throughout your facility. Drum handling equipment is commonly used in industrial and commercial environments to safely move large drums and barrels.

#### Compatibility

- Fits most standard closed-top and open-top 55 gallon steel drums
- May also fit many poly drums depending on outside diameter
- Always measure your drum before ordering

#### Suggested Accessories

- 55 gallon drum pumps
- Bulk chemical transfer pumps

>

- Metering valves
- Chemical resistant hose kits
- Spill containment pallets
- Drum funnels
- Secondary containment systems

#### Important Notes

- Drum and contents are not included
- Color and wheel style may vary from images shown
- Specifications subject to change without notice
- Commercial use item
