Model Number: 17324598

Steambrite TM31 and TM33 Hydrotek Trailer Floor Support Brackets - Painted and cut 17324598

Manufacturer: Steambrite MFG

Hydrotek 185SKH Trailer / Steambrite TM31 and TM33 Trailer Floor Support Brackets - Painted and cut 17324598

This extends the length of the trailer by 4"

Here is what is included from this web page:

Four angle iron 2" X 2" X 1/8" X 20" Long - Notched on one end at 2" X 1-5/8" deep and Notched at the other end 2" X 1-1/8" deep and Powder coated for rust prevention. (installs cross ways to assist to support heavier loads)

1 angle iron 4" X 4" X 1/4" X 47-1/2" Long Powder Coated for rust resistance (extends the length of the total trailer by 4")

10 units of 3/8" hex cap bolts X 1" Long

20 Units of 3/8" flat washers

10 units of 3/8" nuts

20 units of 1/4" X 3/8" Grip Aluminum Rivets

Labor not included but optional for San Antonio pickup.

Install on the rear of trailer under the diamond tread plate to support the weight of the generator and vacuum recovery system or other equipment you might want to transport.

Use the support brackets from this web page and Add the Diamond aluminum tread plate to the back of the trailer

Thumbnail photos shows the brackets just laying on the trailer, the photo just above shows the brackets positioned in the correct locations. You want the brackets to fall just under the feet on both the Goliath Vacuum and the generator. The 4 smaller cross brackets are riveted into place before the aluminum tread plate is located on top. The Goliath and generator are bolted through the tread plate and mounted to the new supports.
