Model : System 2100

ACS: System 2100 Truckmount

Manufacturer : American Cleaning Systems

System 2100

This is our most popular machine. It has a simple and efficient design with minimal maintenance required. It doesn't need costly propane or kerosene to run. This is a heavy duty machine with a heavier than usual steel frame.

Features

Dual Heat Exchangers

The dual heat exchangers use an unique tube and shell design that will efficiently heat water up to 220 degrees F. It is made out of heavy guage stainless steel that is easily serviceable with no need to replace parts.

Hypro Water Pump

The Hypro water pump is belt driven and easily adjusted. It circulates only cold water though the pump, increasing the life of the water pump. Is also has three pistons for less pulsation.

Hypro 2330B-L, 1500 PSI, 3 Piston

Open Side Servicing

The accessible design makes the machine easy to adjust, clean and maintain. This also makes it extremely user friendly.

Complete Instrumentation

The instruments includes temperature and pressure gauges, tachometer and hour meter, vacuum and amp gauges.

Tuthill Competitor Plus Blower

Each unit uses a Tuthill Blower, providing quite operation and rugged durability. This also makes it have vacuum power to spare.

Tuthill Competitor Plus

Kohler Engine

Kohler Engines are dependable and efficient. The two cylinder engine is easy to maintain and has nation wide dealer support. It has a proven quality overhead valve design.

22 HP

This price is for a base unit only. All accessories are sold seperatly.
