HEPA Back Pack Vacuum
October 28, 2009

HEPA BACK PACK VACUUM This HEPA Back Pack Vacuum is lightweight at 11 lbs with 11.5 amps of power pulling an impressive 150 CFM of airflow and 100 inches of static lift. It has a 10 Qt. capacity with a built in heat sensor. The top fill design has a twist off lid and 1 1/2" hose inlet to reduce clogging and allows the 10 Qt. filter bag to completely fill without losing suction. Extra cushion shoulder straps and waist belt adjust for user comfort. The On/Off switch box has built in fingertip control and Velcro's directly to the waist belt located next to your hip for added comfort. The durable molded housing will provide years of service in cleaning supply and return boxes, air handlers on roofs, in attics, basements and crawl spaces where a full size HEPA vacuum is impractical. The 1 1/2" x 4" crushproof hose with swivel cuffs comes standard on the HEPA Back Pack Vacuum and the 1 1/2" x 10" hose can be purchased separately. The 1 1/2" hose cuff fits standard vacuum accessories.

Price : \$421.99
