Manufacturer : Air-Care

TURBOJET MODEL 1912

The Turbojet 1912 is light weight, but packs the same 1.5 horsepower motor and backward inclined fan used in the Turbojet 2012V. The vertical, cylindrical design gives the technician easy access in small homes, basements, stairways

Air Care: TurboJet Light 1912 (Free Shipping!) Air Scrubber

and mobile homes with enough pull to simultaneously clean supply and return ducts using the optional unique dual "inlet with adapter. (Part No. CE2298).

The upper cylinder contains the filters and detaches to be carried in the back seat of a normal car. The bottom cylinder contains the motor and blower and will fit in the rear hatch or trunk. With the patented coaxial connection, alignment pin and stabilizing latches, the Turbojet 1912 is a well balance dolly, that effortlessly crosses rough, smooth or even grassy areas.

Horizontal and vertical operation provide you with easy attachment to furnace plenums, floor duct, or ceiling supplies. In commercial buildings two Turbojets can be connected together with the optional plenum adapter (Item #CE2299) to provide twice the performance when needed for larger commercial jobs.
