

## CFR: Cascade 20 Self Propelled - 400psi - 1/3 Vacs - Nonheated (Free Shipping!)

Model : 10416A-FR

CFR: Cascade 20 Self Propelled - 400psi - 1/3 Vacs - Nonheated (Free Shipping!)

Manufacturer : CFR

### Includes:

- Wand
- Combo tool
- 33 Feet worth of hoses

### Introducing CFR's Cascade Mid-Size Cleaning System

Innovative technology built into a mid-size cleaning system that out cleans conventional extractors with CFR's patented continuous flow cleaning method.

The Cascade 20 is the ultimate in productivity combined with CFR's unique cleaning technology. Not only does it clean more square feet per hour than any other mid-size extractor, it also removes more soil from the carpet. With a run time of over an hour between refills, the Cascade

## CFR: Cascade 20 Self Propelled - 400psi - 1/3 Vacs - Nonheated (Free Shipping!)

20 has a productivity rating of 8,000 square feet per hour. All other mid-size extractors pale in comparison, refilling their tanks once, twice or more. CFR's 20 gallon system outperforms units twice its size. The Cascade 20 is available as a self contained work station or in a Pro version both for use with wand and hand tools.

Clam shell design for easy access to components for maintenance.

Finger tip controls and ergonomic handles for ease of operation.

Available in self-contained or wand systems.

20's cleaning path with superior edge cleaning with narrow profile.

### FASTER

The Cascade 20 is designed to safely clean and maintain both large and small carpeted areas. It is a high

## CFR: Cascade 20 Self Propelled - 400psi - 1/3 Vacs - Nonheated (Free Shipping!)

efficiency, self propelled, walk-behind, single pass cleaning system. The high volume P20 delivers cleaning solution at 400 p.s.i. and is a total cleaning system for carpet, upholstery, fabric wall panels and hard surfaces.

### CLEANER

At 400 p.s.i. and 1.3 gallons per minute the P20 is the new standard for portable cleaning systems on the market. It is designed to provide unmatched carpet, upholstery, hard surface cleaning and restoration. It is specially designed to clean virtually every surface in a building including modular office panels, fabric covered walls, grouted tile, marble and vinyl wall coverings to name a few.

### DRIER

The unique CFR technology provides total solution control. The cleaning fluid never rests on the carpet. The Cascade 20's patented cleaning tools controls the solution at all times. Solution is injected with air at a very high velocity. It passes through the carpet fibers and is pulled into the tank. This unique solution control system simply means drying times are cut to a fraction of conventional machines.
