## Drieaz: DriTec 150 Pro Ducting

Safety  
UL 94 V-O flame retardant

### DriTec Pro 150 Ducting Kit

The 2-inch moist air outlet on the DriTec Pro 150 must be ducted to operate properly (see note below). The ducting kit includes 2-inch ducting that is 13 feet long, and one 2-inch hose clamp. It is lightweight, flexible and listed as a UL 94 V-O flame retardant.

**IMPORTANT:** This ducting has a heat rating of 325 °F (162.8 °C), which is the rating required for the DriTec Pro 150.

Note: The 4-inch dry air outlet may or may not be ducted using standard ducting; use no ducting for maximum operating capacity. If 4-inch ducting is used, use no more than 13 feet when operating on low, and no more than 32 feet on high.

Compatible with the DriTec Pro 150

**Price : \$114.00**
