GE Protimeter Surveymaster

Two great meters in one

The Surveymaster offers two ways to

monitor the moisture content of materials: penetrating pins

and non-invasive radio frequencies. Use it to distinguish

sub-surface from surface dampness, essential information

when diagnosing the extent and cause of a moisture problem.

Search Mode

Detects moisture without making

holes in materials, and independently of surface moisture.

Uses non-invasive radio frequencies to search for moisture behind finished materials like ceramic tile and vinyl flooring.

Measure Mode

Penetrates materials with pin

electrodes to take precise readings of moisture content in
