Dri-Eaz presents the
GE Protimeter MMS Plus
Moisture Measurement System + Logging
NEW — Full Range RH!
Measures 0-100% RH and 32-122°F
with new Humistick®; probe (also compatible with
Hygrostick®; probe)

Three meters in one
The complete meter package! The MMS
Plus system combines three different meter functions into one
convenient unit, plus it serves as a data logger. It's a
revolutionary tool, one that's ideal for the restorer that wants
to update to an all-in-one system.

Hygrometer Mode
Measures the relative humidity,
temperature, dewpoint, proximity to dewpoint, and grains per

Drieaz: Protimeter MMS Plus Moisture Meter

pound (GPP) with the modular, replaceable Protimeter Hygrostick™.

Pin Measure Mode

Use the penetrating pins to determine the moisture content of wood and the Wood Moisture Equivalent (WME) value of other building materials. Add an optional Hammer Electrode to increase versatility.

Pinless Measure Mode

Uses non-invasive radio frequencies to detect the presence of moisture without damaging materials.

Data Logger

Stores up to 1,000 results (with date and time stamp) for downloading to your computer. Allows you to keep clear records of drying conditions that help to safeguard your business and protect your customers.
