## Durrmaid: 200 psi Super 1600 Heated Auto Detail Extractor

Model : 1600

Durrmaid: 200 psi Super 1600 Heated Auto Detail Extractor

Manufacturer : DurrMaid

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum does double duty! It works as a powerful hot water extractor and a wet/dry vacuum. No need for two separate machines! A 200 psi water pump and enhanced suction distinguish the Super 1600 from other portable hot water extractors. For detailers and do-it-yourselfers, the Durrmaid Super 1600 Extractor and Wet/Dry Vacuum is one versatile, cost-effective carpet cleaning machine.

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum fulfills your need for a powerful wet/dry vac and a high performance hot water extractor. If you're in the business of detailing, this saves you an expense because you're only buying one machine to do two jobs. The Super 1600 does both jobs very well. In fact, the Super 1600 has a 23% more powerful vacuum motor! If you're looking for a hot water extractor and shop vac in one, this is it.

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum has a capacity of 2.1 gallons, making it incredibly light and user-friendly for a professional grade extractor. The Super 1600 features 3 inch heavy duty casters, which give you more maneuverability when cleaning carpet in a vehicle, boat, RV, or carpet spoting at home.

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum is the ONLY portable extractor with a 200 psi water pump! No other hot water extractor combines a compact size with such impressive cleaning power. The water pump delivers hot water to the carpet to break up spots and stains quickly, even stubborn, greasy stains!

The Lexan attachment allows you to see dirt as it is removed from carpet and upholstery.

## Durrmaid: 200 psi Super 1600 Heated Auto Detail Extractor

The filter bag catches large debris before it enters the recovery tank.

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum has an easy-access control panel just behind the handle, including a water level indicator light and a heater light. Once the water tank is filled, it takes about 15 minutes to heat, and it maintains that heat as you work.

A 200 micron, nylon filter bag in the recovery tank enables the Durrmaid to pick up heavy debris, like dirt, sand and even hair. The bag holds up to 5 lbs. of debris! This feature enables you to dump solid debris into the trash and pour out the liquid waste water separately. Quickly empty the filter bag with a quick turn of the lid. The contents empty through an opening in the bottom of the bag, as shown to the right.

The Durrmaid Super 1600 Extractor & Wet Dry Vacuum includes a see-through Lexan Carpet/Upholstery Tool. This detailing tool has stainless steel glides which travel easily over carpet with no friction. Because they're stainless steel, they will not warp due to hot water temperatures.

Two quick-change spray tips allow you to cut the water flow to reduce drying time. The vacuum's suction can be reduced with a thumb control, for delicate areas, like the headliner.

Top right: Optional tips restrict water flow to prevent over-saturation of fabric or carpet. Bottom right: The vacuum reducer limits the suction on delicate surfaces, like the headliner.

## Durrmaid: 200 psi Super 1600 Heated Auto Detail Extractor

For crevices and tight spaces, get the Durrmaid Stainless Steel Crevice Tool (sold separately). This 18 inch long attachment narrows to less than a 1/2 inch, giving you unparalleled access between seats, under seats, between cushions, and anywhere else! The stainless steel barrel and brass spray tip are built for durability.

The ability to remove tough interior stains is what sets successful detailers apart from everyone else. Clean, spot-free carpet and seats will keep clients coming back. The Durrmaid Super 1600 Extractor & Wet Dry Vacuum is a space-saving and time-saving option for mobile detailers.

You can see how the Durrmaid Super 1600 Extractor & Wet Dry Vacuum restores the beauty of automotive carpet.
