PVR Portable Vacuum Recovery Filter

RPVRE1 Portable Multi-Purpose Vacuum Recovery 4-IN-1 20 Micron Polishing Up to 6 GPM 120 volt, 20 amp

Technical Information

PVR Tek Sheet

PVR

PVR Self Contained Portable Unit

The PVR is rolled right to your wash site for wastewater recovery. Up to 6gpm of water run-off is contained and sucked up using a unique vacuum scupper to eliminate water runoff at the wash site. The recovered wastewater is filtered to 20 micron and transferred up to 200 feet away to your supply tank for reuse. This system offers a quick purge dump for collected solids and reusable filters for easy maintenance. Whether you're a professional mobile washer, auto detailer, fleet washer or just need to recover wastewater, this is the most effective portable filtration system on the market to meet wash water containment issues.

Features & Benefits

- Meets Current EPA Requirements

> Hydrotek: Portable Vacuum Filtration System

Hydrotek: Portable Vacuum Filtration System

- Continuous process rate up to 6gpm
- Wet Vacuum / Dry Vacuum
- Water Recovery and Treatment
- Transfer water up to 200 Feet
- 120v, 20amp with 35' GFCI cord
- Strains large debris before processing through pleated filter
- Compact design weighs about 100#s
- Includes:
 - (2) Sand Berms
