MasterBlend: El Diablo Truckmount Kerosene Fired (Free Shipping!)

Manufacturer : MasterBlend

### GUARANTEED LOWEST PRICE

Simple is good: If you ever owned a truck mount before—SIMPLE IS GOOD!. Everything is easily accessible and spaced for easy access — chemical feed is directly through the pump and adjustment through the flo-meter (no chemical diaphragm pump) — no heat exchangers to challenge your waste tank with bypass dumping of hot water or a diverter valve with solenoids and moving parts to perplex your distributor's service department as to what is wrong with this thing! The El Diablo weighs approximately 500 pounds and can be mounted in either the rear or side of a van. A rear installation allows a vacuum hose reel to set next to the unit, leaving the rest of the van open.

Powerful: A 24 h.p. Honda V-Twin engine directly driving a Roots 4.5 blower with direct 2 1/2 inch plumbing from the 70 gallon stainless steel waste tank to the blower and out of the blower to the silencer system provide maximum airflow and vacuum. (The first customers are asking if there is a way to turn the vacuum down). (Available in Diesel or Propane!) The waste tank is notched to allow you to mount the machine by the back door or side door of your service van.

A High Performance option allows the ability to have exceptional long vacuum hose runs on difficult commercial jobs—up to 500 to 700 feet, with performance that rivals the performance of units using 5.6 blowers—units which cost \$20,000, plus!! The High Performance option provides outstanding water restoration capabilities, as well as dual wand operation.

High Quality means using the very best components that are industry proven: Honda VTwin 24 h.p. engine is the best engine in overall performance and torque; the Roots 4.5 blower is the industry leader in reliability and quietness; the Cat 3CP pump with a clutch is simply the best in the industry. The 70 gallon waste tank is stainless steel and guaranteed for 10 years. The waste tank features an aluminum waste basket for easy maintenance and an automatic pump out option. A 125,000 BTU propane heater delivers consistent 225 degree cleaning temperatures.

Optional: Auto Dump \$1300

Optional 100 gallon over the wheel well tank with hoses \$845

Optional: 50ft vacuum and 3000 psi solution hose sets \$159 each (cannot guarantee hose color), With hose color
