Motobrush Air Duct Cleaning Tool

Manufacturer : -

MOTOBUSH
POWERFUL, PORTABLE AND AFFORDABLE!

The Cordless Drill-Powered Air Duct Cleaning Tool That
BRUSHES AND VACUUMS!

"It's like having a Rotobrush that fits in a bag!"
ECS/NY
"Definitely worth the money. Made over \$400.00 on my
first job. Great product!" Buy-It-Pronto/eBay
"A great tool for any level air duct cleaner!" CS/NJ
"Great customer service, good product!"
vhv73/eBay

Start your own AIR DUCT CLEANING BUSINESS without
spending thousands!

The Motobrush was designed with power, versatility, quality
and ultimate portability in mind.
Unlike other rotating brush systems, brush direction, torque
and rpm are always at your fingertips.
It has been fully tested and approved for
residential/light-commercial air duct cleaning by NADCA
certified technicians.

25' X 1.5" HD Safety Blue Vacuum Hose (for tool to vacuum connection)

Limited Warranty

Unlimited Tech Support

Instructions & Cleaning Procedure

HOW IT WORKS:

Motobrush Air Duct Cleaning Tool

Attach a cordless drill/not included to the Motobrush drill adapter. Clean multiple houses on a single charge! See our FAQ section or Contact Us for cordless drill recommendations.

Attach any vacuum/not included (shop vac, commercial vac, industrial vac, portable or truckmount carpet extractor) to the Motobrush 1.5" outlet barb. See our FAQ section or Contact Us for vacuum recommendations.

Rotate the brush forward on the way into the vent/duct and reverse on the way out. Dust is dislodged and collected simultaneously!

FEATURES:

25' X 1.5" MOTOBRUSH Tool Assembly - Capable of cleaning distances up to 25' from each access point. Lightweight and easy to operate! No messy wires to get tangled or heavy equipment to lift up/down stairs and into attics or crawlspaces. With the included tool to vacuum hose, the vacuum can be left in one central location 25' away from the operator! This makes cleaning multiple vents easier compared to bulky all-in-one systems.

12" MX-R Brush - Cleans it all (round, square or rectangular) and is safe for use on all types of ductwork. Capable of cleaning ducts up to 12" X 24". No need to carry an arsenal of brushes! Brush design enables the Motobrush to collect dust that is dislodged ahead of the brush as well as behind it. This eliminates pushing the dust further into the system and cross-contamination. Life-time aluminum brush shaft never needs replacing. *For larger ductwork check out the 18" MX-R Brush or 24" MX Bristle Pack. *For dryer vents check out the NEW 4" MX-D Dryer Vent Brush.

Dual-Port Intake Nozzle - Large openings eliminate clogging.

Precision Dual-Bearing Design - Unlike other rotating brush systems, the Motobrush dual-bearing design provides ultra-smooth brush rotation and keeps the flexible drive shaft centered inside the vacuum hose at both ends of the tool assembly. This prevents hose wear, shaft damage and downtime!

Motobrush Air Duct Cleaning Tool

Manufactured In USA

(VACUUM AND/OR CORDLESS DRILL SHOWN IN PICTURES NOT INCLUDED)

Advertiser makes no claims of affiliation to NADCA (National Air Duct Cleaners Association) or Rotobrush (Rotobrush International LLC).

The MOTOBRUSH apparatus and method have been documented and duly filed with the USPTO. Any person(s) attempting to infringe upon said apparatus and/or method that violate US patent laws will be subject to immediate legal action and/or prosecution in accordance with said laws. Patent Pending.
