The Whole Room Dryers!

New Professional Downdraft™; Whole Room Dryer/Axial Fans

No more drying a room, one section at a time. One dryer will dry an entire room in as little as 15 minutes. Dryers or air movers are typically spaced around a room in various positions to take advantage of walls and other surfaces to dry carpets as quickly as possible. But, a typical dryer has limited surface coverage and does not take advantage of the warm air at the top of a room. The new Downdraft™; dryers by Powr-Flite changes drying as we know it. No more leaving damp carpets to dry after you leave a job! The fan blades are precision pitched to pull warmer, drier air down, through the dryer, blowing it across the entire room for fast complete drying with only 1 dryer for the "whole" room. The commercial "Whole" room dryer!

Dry an average sized room in just minutes with NEW downdraft™; drying technology! The new professional Powr-Flite Downdraft™; fans are the most versatile air movers available with multiple positions for every drying need...including 360°; downdraft™; drying. Downdraft™; drying takes advantage of the warmer air circulating at the top of a room, pulling it down, through the Downdraft™; and blasting it out over every square inch of the room, drying the carpet fast.

Multiple position versatility, 2 speeds, precision pitch fans
