13655 Stowe Dr.
Poway, CA 92064

While Mytee Products, Inc. is a relatively young company, its roots go back decades. After doing janitorial cleaning for several years in the Los Angeles area, John LaBarbera started building carpet cleaning machines in his father, Frank LaBarbera's garage in 1977. The Carpet Jenny Company was thus formed and Frank and John became partners, moving the company to Colorado Springs, Colorado in 1978.

In 1990, the company was sold and the families moved back to California. In 1994, John started a company centered on a portable water heater product, the "Mytee Hot," thus the name Mytee Products was born. In 1994, our innovative "Deluxe Prep Center" was introduced for the auto reconditioning industry. In 1995 due to the success of the Prep Center, even more auto detailing machines were added to the line.

Mytee Products, Inc, located just outside of San Diego, is one of the premier manufacturers of professional cleaning equipment in the world. We have always been known for our innovation and reasonable prices. With a full range of professional automotive detailing equipment, we are dedicated to meeting the needs of the most demanding professionals worldwide.

Extractors

It's What We Do

There are a lot of manufacturers out there who claim to make auto detailing extractors. However, upon closer inspection, you'll find that they actually make machines for carpet cleaners, and have just modified them slightly for the auto detailing market.

That's not the case here at Mytee. We started out making machines specifically for detailing. Our units were designed from the ground up with the challenges and task that you will face in mind. Because of this, we make the best selling upholstery extractors in the industry. Visit your local car wash, car lot, auto auction, body shop, rental car agency, or mobile detailer, and chances are you'll find a Mytee machine in their cleaning arsenal.

Our machines offer unparalleled value, performance, and convenience. Once you use a Mytee extractor, you'll never go back to detailing any other way again.

Tempo™

Sub-compact machine, full-size performance.

Perfect for the occasional detail job, or for the serious home detailer, the Tempo™ packs a lot of power into a small package. At only 1.5 gallons, this light machine can be easily carried in one hand. It sets up in seconds, and operates on a single convenient switch.

However, it's small body can be deceiving. This unit has the most powerful vacuum motor in it's class, allowing you to perform a deep and thorough cleaning of mats, upholstery, and carpets. It also features a tough stainless steel hand tool, which will outlast the plastic tools used by many of our competitors.

It's easy to fill and empty, with clear view tank lids that let you see what you are extracting. You can even fill the Tempo™ with warm tap water for best results - it's pump system was designed to handle it. At only 20 pounds, you'll find that the Tempo™ takes a load off your back, without taking a load out of your wallet.

Mytee Lite™

Bring on the heat.

Are you looking for an upholstery cleaning machine that can do the job of a full-size extractor, but is small and light enough to hold in one hand? Meet the Mytee-Lite™, the industry's best-selling upholstery cleaning machine and the first of its size to include an on-board heater for maximum cleaning power.

The Mytee-Lite™ is known industry-wide for its heat, which allows you to quickly break up grease and dirt. The two-stage motor is the most powerful in its class, and makes the extractor even more effective at deep cleaning upholstery.

The unit comes complete with a 15' hose and a tough stainless steel hand tool. Other features include an easy lift-off vacuum tank, clear-view lids, and a built-in storage basket for cleaning solutions utensils.

Don't wait! Join the thousands of satisfied customers who have made the Mytee-Lite™ part of their cleaning team.

Spyder™

It puts the "mobile" in mobile detailing.

With 6 gallon capacity tanks, the Spyder takes all of the power of a full size extractor, and packs it into a unit that can be stored and transported easily. This powerhouse unit will give you the same professional results as our 11 gallon units, but is about half the size.

This compact footprint makes it perfect for loading on and off trailers or vans for mobile detailing. It features a powerful 3 stage vacuum, 100 PSI pump, and in-line heater - allowing you professional, fast results wherever you go. The hoses and tools are professional grade for long life. The built in blower outlet can be used with our HP-DRY kit for drying auto interiors (sold separately - see page 17).

Order your power to go. Try the Spyder today.

REAL HEAT™

GrandPrix™

The original.

It transformed the auto detailing industry and became the best-selling and most imitated detailing extractor in the world. Mytee's Grand Prix was the first heated extractor to feature a single power cord. Before this innovation, most heated extractors required two power cords, making it hard to find a power source. But this trailblazer changed all that, and the rest is history.

The HP100 offers maximum vacuum power with a 3 stage vacuum, letting you leave cars dryer. It also features Mytee's "Real Heat" heating technology, which delivers on demand hot water when you need it. The 12 gallon tanks allow you to complete more jobs between fill-ups, and the stainless steel detail tool will stand up to heavy use. The built in blower outlet can also be used with our HP-DRY kit for drying auto interiors (sold separately - see page 17).

See for yourself why this classic sets the standard that other auto detailing extractors are still trying to live up to.

Window and chrome cleaner application

Interior warm air drying

Upholstery steam cleaning

Deluxe Prep

Your new pit crew.

Speed is king. Imagine setting up a detail shop. To get cars done quickly, you'll need to buy a wet-dry vacuum, dry vacuum tools, a carpet extractor, a water heater, upholstery cleaning tools, a chemical dispensing unit, multiple spray bottles, a blower attachment for your compressor, a dryer, and a toolbox. Wow.

Now imagine that you can buy a machine that will take the place of the laundry list above. Imagine a unit you can pull a car up to, and do a complete and thorough interior detail on in one spot. Imagine the saved time. Imagine the saved money!

Now you can stop imagining. The Deluxe Prep Center™ is ready to take on all of the tasks shown on this page, and more. Best of all, it only needs a single electrical outlet, and a shop air source to run. Great for use in car washes, auto auctions, auto rental agencies, car dealers, mechanics, and body shops - anywhere high volume detailing need to get done quickly.

Don't let your detail shop slow you down. Get back on track with the Deluxe Prep Center™.

Leather and vinyl treatment

Deodorizer application

Vacuum and dry at the same time

Vehicle drying/air purging

Sprayers

Water Hog™

High octane results - without the octane!

With 1000 PSI of power, the Water Hog pressure washer blasts away tough road grime and dirt from body panels. It's durable brass head stands up to heavy use, and it's compact integrated motor is both quiet and low maintenance.

The Water Hog is an electric pressure washer - which means no gas engine using up fuel and creating noise and exhaust fumes. It's simple to setup and use - all you need is an electrical outlet to plug into, and you're ready to go.

Pair this washer up with our "professional wash gun kit" (sold separately - see page 17) and you're ready to tackle even the dirtiest cars.

Big B.O.S.S.™

Battery Operated Solution Sprayer.

The Big B.O.S.S.™ frees you from your power cord. The on-board charger can be used with any standard wall outlet for charging - and it's intelli-charge feature means the battery can't be damaged by overcharging, so you can leave the unit plugged in and charging without worry.

As environmental regulations get tougher and tougher, water run-off is becoming a real concern for car washes and detailers. The B.O.S.S.™ allows you to wash a vehicle using low pressure, with virtually no run-off. Paired with a "low moisture wash" chemical, it can be used to effectively wash a vehicle with as little as 2 gallons of total water used. This gives you a "green" advantage over your competitors.

Electric Sprayer™

Convenience and power.

The Electric Sprayer™ offers the same wash advantages as the B.O.S.S., but uses a standard 115V outlet to run the sprayer. Simply plug in at the job site, and you're ready to dispense a variety of chemicals from it's handy 3 gallon capacity tank.

The handy integrated basket is great for holding rags, towels, and chemicals. The large rear wheel make transporting the sprayer easy.

Both sprayers can also be used to dress tires, apply vinyl dressing, window cleaners, and a variety of other cleaners. Their versatility makes them great for use around the home or shop as well.

Accessories

Mytee-Dry™

Tired of hearing customers complaining about their interiors being wet? Who has time to wait around for vehicles to dry? Not you. Get cars detailed and dryer faster with the Mytee-Dry™. This airmover comes with wheels to easily move from one vehicle to the other. Simply place airmover in desired location within vehicle and leave to dry. In minutes the vehicle will be ready for pick up. You'll never have another customer drive home with a wet interior again.

EZ Glider

Great for use in RVs, large vehicles, shops, offices, homes and more.

Upholstery tool

Make upholstery cleaning easy with this 3" stainless steel upholstery tool.

Crevice tool

Narrow spaces and hard to reach areas are no longer difficult to clean with this stainless steel crevice tool.

Professional wash gun kit

Quickly wash vehicles, regardless of size, with Mytee's high pressure wash gun and 25' solution hose. For your pressure washer.

Interior and exterior drying kit

Use the blower nozzle to focus warm air in a concentrated area or blow out debris. The unique window attachment nozzle maximizes airflow, speeds up dry times and dries interiors hands-free while you take care of other business. The kit is competitively priced, and with faster dry times, you'll detail more vehicles. For use with the GrandPrix™ and Spyder™.

1 x 1/4" Vacuum and solution hose

Mytee's 15' vacuum and solution hoses are tough enough to handle high heat, increased vacuum and aggressive chemicals while maintaining flexibility over time.

Modular shelves

Have a lot of chemicals? Keep them organized with Mytee's shelf system. Great for vans.

Bottle holder

Easily attach Mytee's bottle holder to any van for extra storage

System maintainer

Keep your pump, hoses and heaters clean with Mytee's system maintainer. Sold by the case.
