One U.S. Quart (.9463 liters)

## Urine Pre-spray Neutralizing Treatment

UPS is a special synergistic blend of acid neutralizers, detergents, odor counteractants, and decontamination deodorizers for use as a urine contamination neutralizer and as an acid detergent (tannin) spotting solution.

If for any reason you are not thrilled with the performance of UPS return it to your distributor and we'll get you a product that does.

Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in conjunction therewith. The user should thoroughly review the material safety data sheet for this product and follow recommendations for mixing, application, disposal, and the use of any applicable personal protective equipment (PPE). The manufacturer, distributor, and seller of this product warrant that the chemical contained herein conforms to its standard specifications. Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. The manufacturer and seller make no representation or warranty, including merchantability or any other kind, expressed or implied. The foregoing may not be altered except by written agreement by officers of the manufacturer.

### Directions:

#### For pre-treatment and neutralization of urine contamination and deposits

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Mix UPS 1 part solution with 4-6 parts warm or hot water depending upon severity of contamination.
3. Using a spray applicator, saturate spray the affected areas. Make sure that the UPS mixture comes in direct contact with the source material for most effective treatment.
4. Allow 3 to 10 minutes of dwell time.
5. On severe urine contamination, flush liberally and extract with a sub-surface extraction tool or wand. Extract area thoroughly.
6. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.

#### For use as an acid detergent spotter

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Apply UPS straight to the affected area.
3. Allow 3 to 10 minutes of dwell time.
4. On large spills, flush liberally and extract with a sub-surface extraction tool or wand. Extract area thoroughly.
5. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.

**Contents:** Dimethyl ammonium chloride (68424-95-3), glycolic acid (79-14-1), proprietary deodorizing compounds, proprietary surfactants.
