

THIS DUO PACKS A ONE-TWO PUNCH

The Commodore DUO is a powerful multi-use machine that provides deep extraction and interim encapsulation technology in one.

This powerful duo packs a one-two punch.

Dynamic and productive, the Commodore DUO and Voyager DUO combine extraction and interim cleaning into one machine. Simply turn a switch and easily change from extraction to interim cleaning. Free up some space by replacing two machines with one, or improve your cleaning process by adding productive interim cleaning to the mix. Interim cleaning extends the time between scheduled deep extractions and improves your carpet's appearance. In interim mode, this machine operates at only 59 dBA which is ideal for daytime cleaning.

1 The dynamic solution

- Extraction and interim cleaning in one machine
- Change from interim to deep cleaning process at the turn of a switch—no mechanical changeover needed
- With the interim method using the iCapsol encapsulating chemical, the carpet is dry and ready for traffic in approximately 20 minutes.
- iCapsol interim cleaning process extends the time between scheduled deep extractions.

2 Smart design

- Efficiently designed for maximum maneuverability
- Intuitive Control Panel for ease of use and training
- Built-in storage prevents time-wasting trips to get more supplies
- Ability to connect accessory wand or hand tool for detail work

3 Immaculately clean

- Floating dual 20-inch counter-rotating brushes agitate and permeate the cleaners into both sides of the carpet nap for even, thorough cleaning. No operator adjustment needed.
- Powerful dual overlapping vac shoes extract soil and solution fast and efficiently in the deep restorative mode; vacuum shoes are equipped with a glide strip to reduce surface friction
- iCapsol Interim cleaning process extends the time before re-soiling occurs and reduces wicking

4 Five ways to use DUO technology

- Encapsulation—extends time between deep extractions and reduces re-soiling.
- Deep extraction—deep, restorative cleaning.
- Pre-spray and rinse—cleaning of surface soiling and extraction of soil in carpet while leaving the carpet free of shampoo or detergent, reducing resoiling.
- Pre-spray and extraction—deep, restorative cleaning for very dirty carpet.
- Rinse only—surface cleaning of carpet to eliminate detergent and soap build-up, brightening the carpet and reducing resoiling.
