

# DeFoam

## Powdered Defoaming Additive

It prevents foam from forming in wands and hoses. Best of all, the odorless granules will not affect pH or alter cleaning performance.

**De-Foam breaks down existing foam residue which makes your vacuum recovery more efficient and keeps your waste tank from prematurely filling up.**

- DeFoam™ is a powerful anti-foaming agent that can breakdown even the toughest detergent residues. One of the most frustrating things a carpet cleaner can face is when the recovery tank fills up and it is 90% foam. HydraMaster powdered DeFoam contains a trade secret anti-foaming agent. When sprinkled on the carpet, DeFoam breaks down foam before it gets to your machine.
- It is safer for you and your customers – the active ingredient is also used in food processing. Unlike some liquid defoamers that leave a sticky residue behind, CleanMaster DeFoam is a residue free formula. It breaks down existing foam residue which makes your vacuum recovery more efficient and keeps your waste tank from prematurely filling up.

Available in: 6.5 Pound Jar; Case of 4 x 6.5 Pound Jar  
Part # 950-177

### Mixing Directions:

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Apply small amount of water to carpet and agitate to determine the presence of foaming residue.
3. To reduce foam build-up in waste tank, add one ounce of De-Foam to your waste tank before the job starts.
4. To reduce foam build-up in vacuum recover hoses directly, sprinkle 1 ounce of powder into vacuum hose at the cleaning wand end and let the vacuum pull the solution through the hose.
5. For severe foam issues in the carpet, sparingly spread, broadcast or "chicken feed" De-Foam over entire carpet.
6. Increase or decrease the amount as needed to eliminate foam.
7. Proceed to clean in normal manner.
