Fibers

## Self-Neutralizing Upholstery & Fabric Preconditioning Agent

FabricMaster HD is designed to break down, dissolve, and emulsify soils and spills – body oils, hair treatments, airborne oils, shoe scuffs, spilled food and beverages, crocked colors from clothes, newsprint, and pet hair.

**This specialized formula is specifically designed to break down, dissolve, and emulsify the soils and spills most common to upholstery fabrics.**

- FabricMaster HD Upholstery Pre-spray is designed for the upholstery cleaning craftsperson. While many cleaners use carpet pre-sprays on upholstery, the craftsperson recognizes the important differences between upholstered fabrics and carpeting, as well as the soils that build up in them.
- FabricMaster HD is a self-neutralizing formula that cleans with the power of alkalinity, but then self-neutralizes as it dries. It is designed for use on synthetic upholstery fabrics. It does all of this with the cleaning power of odorless ammonia, combined with specialized solvents and surfactants.
- FabricMaster HD is a low foaming formula that does not leave a sticky residue.

### Mixing Directions:

1. Vacuum fabric thoroughly before starting cleaning process.
2. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
3. For light to medium soil, mix 1 part FabricMaster HD with 4 parts water (32 ounces of solution with 1 gallon of water) into sprayer. For heavy soiling, mix 1 part solution with 1 part water (64 ounces of solution with 64 ounces of water)
4. Apply with hand-held pump up or trigger sprayer in an even, overlapping mist across the entire area of the fabric being cleaned.
5. Allow to dwell for 2-3 minutes. Be careful not to over spray or breathe mist.
6. Agitate with horsehair brush or bonnet mitt.
7. For best results extract area with CleanMaster RinseOut utilizing the HydraMaster DriMaster 3 Upholstery Cleaning Tool.
8. For faster drying, especially in humid environments, consider the use of an axial, centrifugal air mover after cleaning.

Available in: 1 Gallon; Case of 4 x 1 Gallon  
Part # 950-220
